

Pacific Basin

**Deutsche Bank Access China Conference 2012
Beijing · Jan 2012**

23 Dec 2011

Pacific Basin Overview

- A world leading dry bulk owner/operator of handysize & handymax vessels
- Highly flexible Pacific Basin Dry Bulk business model
 - Large fleet of uniform, interchangeable, modern vessels
 - Mix of owned, long-term and short-term chartered ships
 - Diversified customer base of mainly industrial end users
 - Global trading pattern supported by extensive network of regional officers
- Also owning/operating of off-shore and harbour tugs and RoRo freight ferries
- >220 vessels serving major industrial customers around the world
- Hong Kong headquarters, 22 offices worldwide, 380 Group staff, 2,000 seafarers*
- Our vision: we aspire to be a shipping industry leader and the partner of choice for customers, staff, shareholders, and other stakeholders

2011 Third Quarter Highlights

PB Dry Bulk

- Handysize and Handymax freight rates have increased 12% and 22% respectively since 30 June marking an earlier, stronger than anticipated improvement
- BDI increased 52% since mid-year driven by a 147% increase in Capesize rates mainly attributable to:
 - A return to activity following the traditionally quieter summer
 - Healthy commodity demand in Asia – Chinese demand for minor bulks in particular
- We anticipate sustained dry bulk , high scrapping levels and reduced newbuilding deliveries will support a continued relatively healthy supply/demand balance for minor bulk segments in 2012 overall, though this balance could weaken if global economic growth slows further
- We have secured forward cargo cover as follows:

	<u>Year 2011</u>	<u>Year 2012</u>
Handysize	91% (US\$13,450)	32%(US\$13,540)
Handymax	102%(US\$15,320)	70%(US\$14,110)

PB Energy & Infrastructure Services

- Significant improvement is expected to continue with growth in new Australian offshore oil and gas projects

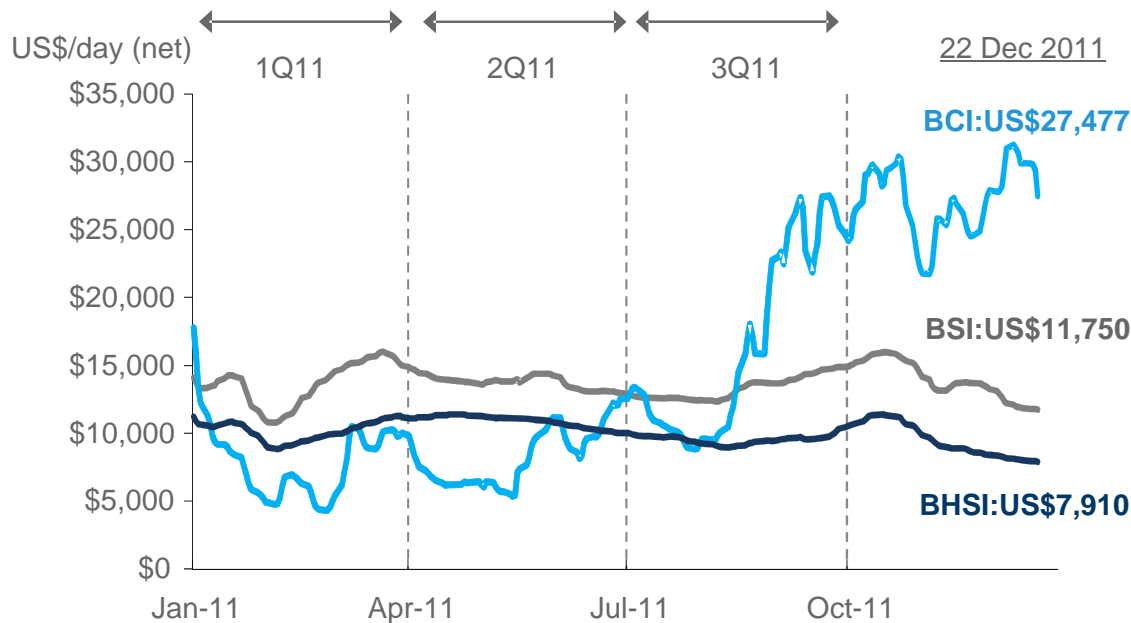

PB RoRo

- Nafta Gulf Bridge service has been suspended due to unsatisfactory demand, but our 2 ships previously employed in that trade have been redeployed
- Expect the charter market for RoRo vessels to remain depressed into 2012

Dry Bulk Market Information

Handysize (BHSI) and Handymax (BSI) versus Capesize (BCI) Spot Rates

Handysize Average: US\$10,171 US\$10,897 US\$9,548
 Capesize Average: US\$7,971 US\$8,274 US\$16,281

Secondhand Handysize Vessel Values (5 year Old 28,000 Dwt)

- We believe banking industry pressures may significantly dampen many ship owners' ability to fund second hand ship acquisitions

Chinese Dry Bulk Trade - Minor Bulk

Dry Bulk Demand

Dry Bulk Fleet Effective Demand

- China coastal cargo, offhire & ballast effect
- Congestion effect
- Tonne-mile effect
- International cargo volumes
- Net demand growth

- Growth in Chinese import of raw materials, including coal and minor bulks such as logs & grains
- Increased Chinese domestic coastal transportation in bulk carriers, especially coal
- Widening East-West imbalance attracting more ballast vessels from Asia to distant load ports for return cargoes

Dry Bulk Fleet Changes

- Dry bulk capacity expanded 14% YOY net
- Handysize expanded only 1% net in the third quarter
- 35% of handysize fleet is over 25 years old
- High scrap price supports healthy scrapping

Handysize Age Profile (25,000-39,999 dwt)
2,035 vessels (64.8m dwt)

m dwt	Dry Bulk	Handysize
2009	10.5	4.1
2010	6.4	1.8
2011YTD	19.0	2.5

Dry Bulk Fleet Deliveries 2011

Dry Bulk Orderbook

Handysize Scheduled Orderbook

583vessels (20m dwt)

- 137m dwt* new dry bulk capacity scheduled to deliver in FY 2011
- Ship owners ordered 66% less newbuilding capacity YOY due to weak market conditions
- We expect approx. 30% slippage in FY 2011
- Less onerous handysize orderbook

Total Dry Bulk Orderbook

2,772vessels (232m dwt)

Total Dry Bulk >10,000 dwt

Category	Orderbook as % of Existing Fleet	Average Age	Over 25 Years
Handysize (25,000-39,999 dwt)	39%	15	36%
Handymax (40,000-64,999 dwt)	31%	11	15%
Panamax (65,000-119,999 dwt)	34%	10	6%
Capesize (120,000+ dwt)	50%	9	4%

Pacific Basin Dry Bulk Earnings Coverage

As at 24 Oct 2011

Pacific Basin Dry Bulk Fleet: 162

at 30 Nov 2011

	Owned		Chartered		Total
	on the water	NB	on the water	NB	
Handysize	30	8	69	7	114
Handymax	3	6	35	2	46
Post-Panamax	1	-	1	-	2
Total	34	14	105	9	162

Average Age of our core fleet: 6.6 years old

Pacific Basin Dry Bulk - Outlook

- China's continued dependence on imported minor bulks
- Slow steaming because of high fuel prices and weak market
- Scrapping increase
- Revival of Japan industrial production

- Continued excessive newbuilding deliveries
- Faltering global economic recovery and stimulus withdrawal
- Less imports due to China tightening policy
- High commodity price favour more Chinese domestic production
- Mining capacity shortfall and commodity supply bottlenecks

PB Conclusion:

- **Softening Chinese demand expected to be balanced by US grain exports in the fourth quarter**

PB Energy & Infrastructure Services

3Q11 Performance

- The market for both offshore and harbour towage services continued its significant improvement in the 3Q
- Further improved rates and trading conditions for PB Towage's Australasia-focused business

Offshore and infrastructure support

- Continued to position PB Towage as a leading sub-contractor to Australasian offshore construction markets
- Queensland Curtis Island LNG project began in February
- Gorgon Project contract extended till 2014

Harbour Towage

- Increased our market share in Australian ports
- Improved performance partially offset by flood-affected Townsville activity

US\$m	1H11	1H10
Offshore/project supply & harbour towage services ("Towage")	3.5	(1.2)
PacMarine Services	0.5	0.7
<u>Fujairah Bulk Shipping ("FBSL")</u>	<u>(5.2)</u>	<u>4.5</u>
Segment net profit in 1H11:	(1.2)	4.0
Annualised return on net assets:	-1%	4%

Towage Fleet: 43 vessels
(as at 30 November 2011)

- 35 Tugs (33 Owned+2 Chartered)
- 7 Barges (6 Owned + 1 Chartered)
- 1 owned Bunker Tanker

PB Energy & Infrastructure Outlook

- High oil prices buoying demand for new, cleaner, safer fuel sources
- Australia striving to become a major LNG exporter
- Continued commodity supply recovery in Queensland

- Faltering global economic recovery
- Australian commodity exports and port activity affected by tightening policy in China
- High commodity prices
- Increasing market competition & political instability in Middle East

PB Conclusion:

- **Significant improvement is expected to continue with growth in new Australian offshore oil and gas projects**

PB RoRo

3Q11 Performance:

- 4 out of 5 delivered vessels are employed, our final newbuilding is scheduled to deliver in Nov 2011
- Nafta Gulf Bridge service has been suspended due to unsatisfactory demand, but our 2 ships previously employed in that trade have been redeployed in the US Gulf at low rates
- Engaging in developing employment for our final 2 newbuildings

Market demand

- Limited improvement in freight market and insufficient demand for new capacity
- Increased trade in the core European economy partly offset by continued weakness in some peripheral European countries

Market supply

- 3% new deliveries in 1H11
- Scrapping continued but at a lower rate (~3%) in 1H11
- 12% orderbook remaining, with deliveries mainly 2011-2012

World RoRo Fleet
438 Vessels (862,453 Lane Metres)

- Segment net profit in 1H11: -US\$5.3m (1H10: profit US\$0.5m)
- Annualised return on net assets: -3%
- US\$80 million impairment of RoRo investment due to reassessment of prospects for the sector, resulting in much weaker outlook for market and our RoRo business
- 1H Daily cost: US\$22,080

PB RoRo Outlook

- Slow growth in European exports and intra-European trade overall
- Gradual, slow growth in trailer volumes
- Scrapping
- High fuel prices making modern vessels more attractive

- Significant new RoRo deliveries scheduled in rest of year
- Most European RoRo operators still have excess capacity and are not chartering new vessels
- Increased austerity in Europe
- Hesitant global economic recovery
- Weak support for RoRo services in US Gulf

PB Conclusion:

- **Expect RoRo charter market to remain depressed into 2012 due to muted growth in freight volumes overall and a potentially weaker European economy threatened by recession**
- **We expect PB RoRo to be loss-making in 2011 and 2012, based on daily cost US\$22,080 in 1H11**
- **PB RoRo earnings coverage:**

As at 24 Oct 2011	FY2011	FY2012
Revenue days	1,570	2,200
Daily charter rates	US\$20,290	US\$27,510
% days covered	80%	16%

Outlook

- We expect:
 - A sustained dry bulk demand, high scrapping levels and reduced newbuilding deliveries will support a continued relatively healthy supply/demand balance for minor bulk segments in 2012 overall
 - This balance could weaken if global economic growth slows further
 - We see evidence of softening Chinese demand for some commodities which we expect to be balanced by the seasonal resumption of 4Q US Gulf grain exports
 - Charter market for RoRo ships to remain depressed into 2012
 - Banking industry pressures may significantly dampen many ship owners' ability to fund second hand ship acquisitions and force them to find additional cash resources to meet capital and banking obligations
 - Pressure on ship values to generate further opportunities to acquire modern dry bulk ships at reasonable cost
- Our strategy remain unchanged: we seek to expand further our dry bulk fleet

Capex and Combined Value by Vessel Types

As at 30 June 2011

A Combined View of Vessel Carrying Values and Commitments

Further commitments expected in Dry Bulk

Borrowing and Capex

As at 30 June 2011

- Vessel capital commitments (US\$348m)
- Bank borrowings (gross of loan arrangement fee) (US\$472m): 2012-2021
- Finance lease liabilities (US\$177m): 2015-2017
- Convertible Bonds (Face value US\$230m): 2016, redeemable in Apr 2014

Cash Flow

Appendix: Differentiated from BDI & Traditional Ship Owning

Smaller bulk carrier segment benefits from:

- Handysize orderbook smaller than ship capacity over 25 years old
- Diverse range of commodities carried and trade patterns
- Greater access to ports
- Growing minor bulk trade imbalances

Fleet

- Modern, large scale & interchangeable ships
- Ability to change market exposure through charter activity
- Higher utilisation and earnings ability through optimum scheduling
- Low breakeven cost and fuel efficient

Unique network of offices

- Close to our customers and understand their needs
- Local chartering and operations staff support
- Broad access to cargo and contract opportunities
- New office in Stamford

Customer focus

- Strong relationship with over 300 customers
- Mainly industrial commodity producers and end-user
- Mixed with spot & long term contracts of affreightment

Corporate profile

- Trusted & transparent counterparty
- Strong public balance sheet and track record

Appendix: Pacific Basin Dry Bulk – Diversified Cargo

- Diverse range of commodities reduces product risk
- Australia and China were our largest loading and discharging zones respectively

Appendix: China at late-Industrialisation Stage

Steel Consumption Per Capita

Tons per Capita

- China growth matches historical trend in Japan and Korea
- Suggests strong growth in dry bulk segment to remain for medium term
- Similar trend for electricity and cement

■ China (from 1990)
■ Japan (from 1950)
■ Korea (from 1970)
■ India (from 2005)

Appendix: China Iron Ore & Coal Demand

China is a net importer of coal in 2011

China Iron Ore Sourcing for Steel Production

Appendix: 2011 Interim Financial Highlights

Segment net profit

- Treasury
- Non direct G&A

Underlying profit

- Unrealised derivative income / (expenses)
- Gain from sale of shares in Green Dragon Gas
- Vessel impairment charges – RoRo
