

Pacific Basin

1Q18 Trading Update

12 April 2018

Highlights

2018 First Quarter Trading Update

- Handysize and Supramax freight market indices YTD have followed similar pattern as in recent years, although at a significantly higher level with a short seasonal decline in early 2018 and recovery after Chinese New Year
- In Jan 18 we took delivery of the last of 5 vessels we committed to acquire in Aug17, increasing our owned fleet to 106 ships on the water
- Our capacity in 1Q18 was substantially unchanged from a year ago as we operated more owned ships but took in fewer short-term chartered ships primarily due to reduced Chinese steel export volumes
- Market improvement since last year benefits our increased proportion of owned ships which have mainly fixed costs
- We continue to look at good quality secondhand ship acquisition opportunities as prices are still historically attractive, resulting in reasonable break-even levels and shorter payback times
- Minor bulk improvement in 1Q18 is encouraging with supply fundamentals looking more positive - we are cautiously optimistic for a continued market recovery, although with some volatility along the way

2018 First Quarter Performance and 2018 Cover

Cover as at 6 Apr 2018

	US\$/day	Handysize	Supramax	
1Q	Market (BHSI/BSI) index net rate	8,070	10,190	Improvement over 1Q17: Handysize: +25% / \$1,900 Supramax: +40% / \$3,220
	PB daily TCE net rate	9,360	11,250	
	PB outperformance	16% / 1,290	10% / 1,060	
2Q-4Q	PB daily TCE net cover rate	9,710	11,490	
	% cover for remaining contracted days	44%	66%	
FY	PB daily TCE net cover rate	9,540	11,370	Improvement over FY17 (actual): Handysize: +15% / \$1,220 Supramax: +18% / \$1,760
	% of contracted days covered	61%	79%	

Market Review

Freight Market Recovery Continues

Handysize Market Spot Rates in 2016-2018

Supramax Market Spot Rates in 2016-2018

- YTD 2018 freight indices are following a similar seasonal pattern as last year, although at a higher level
- Demand was partly driven by strong 9% increase in Chinese dry bulk imports, especially minor bulks which increased about 17% YOY (Jan-Feb)
- In the Pacific, stronger market freight rates were partly supported by a shortage of suitable capacity and a continuing recovery in demand for commodities such as concentrates and logs from Australia / NZ
- In the Atlantic, Brazil and Argentina agri-bulk exports grew strongly YOY, partly offset by weaker US exports

* excludes 5% commission

BSI is now based on a standard 58,000 dwt bulk carrier
Source: Baltic Exchange, data as at 10 Apr 2018

Impact of Recent Trade Tariffs

Recent Protectionist Measures

Impact to the Dry Bulk industry and Pacific Basin

March

US imposed tariffs on steel and aluminum from certain countries

China announced retaliatory measures in response to US trade measures

- **Now in effect but we do NOT expect a material impact**
Dry bulk cargo flows threatened by these protectionist measures account for only a small fraction of the trades in which Pacific Basin is engaged and we do NOT expect them to have a material impact on overall dry bulk market

April

US proposed further trade restrictions on China in retaliation of alleged unfair trade practices and unauthorised intellectual property transfer targeting US\$100 billion in Chinese goods

China promptly announced plan to impose retaliatory import tariffs, including on US soybean and other agricultural products

- **Could impact cargo flows and has already generated some negative sentiment in the market**
Timing and scale of Chinese tariffs depend on the eventual form of the US measures which remain subject to lengthy public consultation
 - Several important points to bear in mind:
 - Total US soybean exports to China in 2017 represent about 0.6% of total dry bulk seaborne trade
 - Majority of this volume moves in Panamax and Kamsarmax
 - No implementation date for the tariffs has yet been set
 - Impact on trade volumes in the medium term would likely be limited as high season for US soybean exports does not start until 4Q
 - While Chinese buyers will still depend on significant soybean imports from the US, they will likely continue to buy more from Brazil
- While we believe these protectionist actions could affect the dry bulk trade, the impact would be largely outweighed by positive dry bulk supply fundamentals and continued global dry bulk trade growth overall

Historically Low Handysize and Supramax Orderbook

- Slower growth in global dry bulk capacity was a key driver of the improved freight market during 1Q18
- Combined Handysize and Supramax orderbook has reduced to 5.5%, the lowest since 1990s
- Significantly lower orderbook for Handysize and Supramax in 2019 and beyond

Better Fundamentals for Handysize

	Orderbook as % of Existing Fleet	Average Age	Over 20 Years	Over 15 Years	YTD Scrapping as % of Existing Fleet as at 1 Apr 2018 (annualised)	
 Handysize – 81m dwt (25,000-41,999 dwt)	6.2%	10	11%	17%	0.6%	Lower orderbook More older ships
 Supramax – 195m dwt (42,000-64,999 dwt)	5.2%	9	7%	15%	0.4%	
 Panamax – 219m dwt (65,000-119,999 dwt)	8.2%	9	6%	17%	0.3%	
 Capesize and larger – 312m dwt (120,000+ dwt)	15.3%	8	6%	12%	1.4%	
Total Dry Bulk – 824m dwt (>10,000 dwt)	9.9%	10	7%	15%	0.8%	

We now refer to the Handymax, Supramax and Ultramax segments more generally as “Supramax”, and we now consider 42,000 dwt as the cut-off between Handysize and Supramax

Source: Clarksons Research , as at 1 Apr 2018

1Q18 Trading Update

Favourable Dry Bulk Supply and Demand Outlook

- Demand outpacing supply
- Progressively fewer new ships will deliver from shipyards in 2018 and 2019
- Clarksons Research estimate: 3.5% tonne-mile demand growth and 2.0% net fleet growth in 2018 (3.2% deliveries – 1.2% scrapping)
- Expected actual deliveries will be around 26m dwt compared to 38m dwt in 2017

Improved Outlook Supports Vessel Values

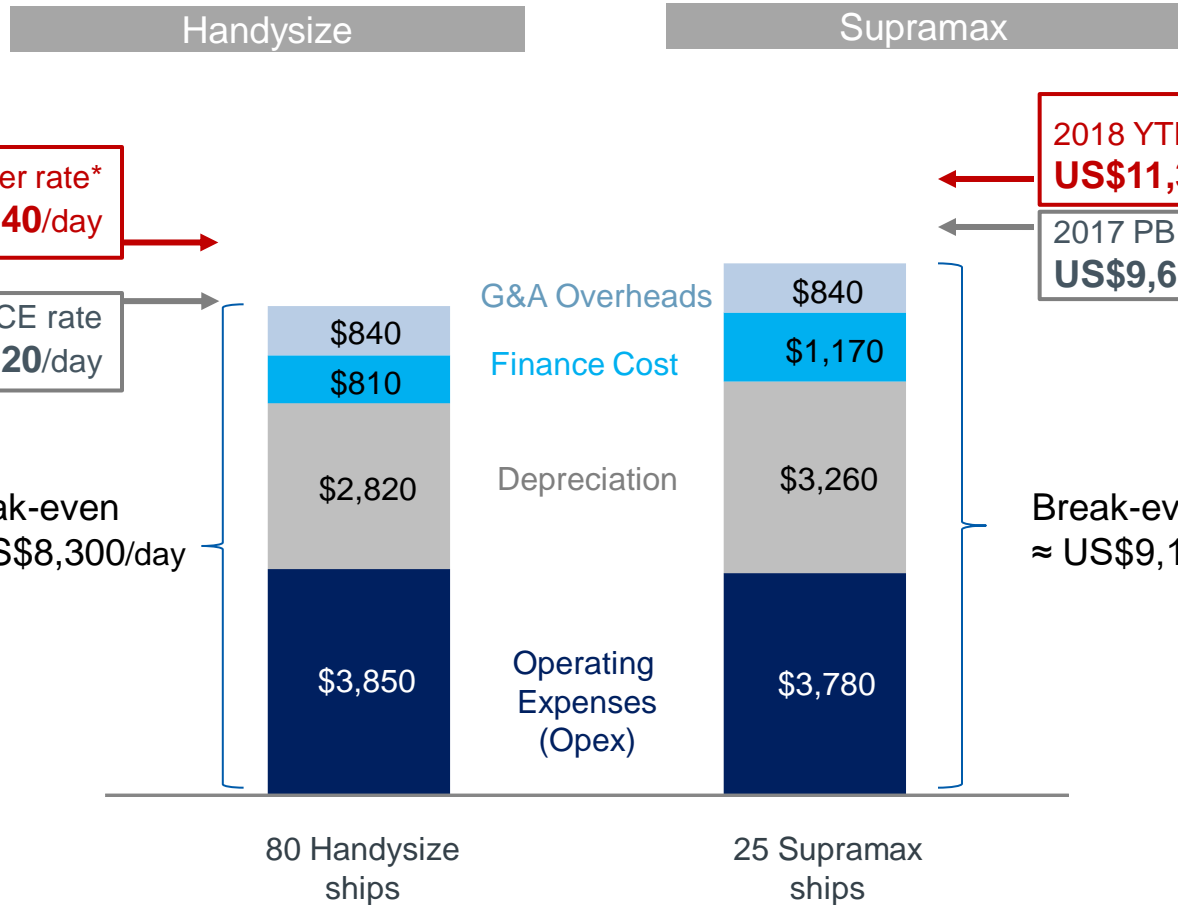

- Improved freight market conditions supported both newbuilding and secondhand vessel values
- However, gap between newbuilding and secondhand prices continues to discourage new ship ordering
- We still see upside in secondhand values

Outlook and Strategy

Competitive Owned Vessel Break-Even Levels

* 2018 1Q Actual + 2Q to 4Q Cover as at 6 Apr 2018

Our Business Model Continues to Outperform

Our business model has been refined over many years. We are able to generate a TCE earnings premium over market rates because of our high laden percentage (minimum ballast legs), which is made possible by a combination of:

- Our fleet scale
- High-quality interchangeable ships
- Experienced staff
- Global office network
- Our cargo contracts, relationships and direct interaction with end users
- Our fleet has a high proportion of owned vessels facilitating greater control and minimising trading constraints
- Our segment's versatile ships and diverse trades

Our Outlook and Strategy

Outlook

- 1Q18 market improvement for minor bulk is encouraging, and all-important supply fundamentals look more positive
- Possible market drivers in the medium term:
 - +** Positive economic growth and commodity demand outlook, low deliveries, and new regulations
 - Increased protectionism, risk of reduced Chinese coal and ore imports, increased new ship ordering and higher ship operating speeds
- We are cautiously optimistic for a continued market recovery, although with some volatility along the way

Strategy – Well Positioned for a Recovering Market

- Continue to focus on our world-leading Handysize and Supramax business
- Maximise our fleet utilisation and TCE earnings by combining minor bulk characteristics with our large fleet of interchangeable ships and global network
- We continue to look at good quality secondhand ship acquisition opportunities
- No newbuildings in the medium term, we continue to watch technological, fuel and regulatory developments closely
- Healthy cash and net gearing positions enhance our ability to take advantage of opportunities to grow our business and attract cargo as a strong partner
- Robust business model, larger owned fleet and competitive cost structure position us well to navigate and benefit from the recovering market

Modern quality ships with the best-in-class design

Low breakeven cost and fuel efficient

Our Worldwide Network and Trading Areas

Our Market Shares

We operate approx. 7% of global 25-42,000 dwt Handysize ships of less than 20 years old; and approx 3% of global 50-65,000 dwt Supramax of less than 20 years old

MARKET-LEADING CUSTOMER FOCUS & SERVICE

Priority to build and sustain long-term customer relationships

Solution-driven approach ensures accessibility, responsiveness and flexibility towards customers

Close partnership with customers generates enhanced access to spot cargoes and long-term cargo contract opportunities of mutual benefit

LARGE FLEET & MODERN VERSATILE SHIPS

Fleet scale and interchangeable high-quality ships facilitate service flexibility for customers, optimised scheduling and maximised vessel and fleet utilisation

In-house technical operations facilitate enhanced health & safety, quality and cost control, and enhanced service reliability and seamless integrated service and support for customers

COMPREHENSIVE GLOBAL OFFICE NETWORK

Integrated international service enhanced by experienced commercial and technical staff around the world

Being local facilitates clear understanding of and response to customers' needs and first-rate personalised service

Being global facilitates comprehensive market intelligence and cargo opportunities, and optimal trading and positioning of our fleet

STRONG CORPORATE & FINANCIAL PROFILE

Striving for best-in-class internal and external reporting, transparency and corporate stewardship

Strong cash position and track record set us apart as a preferred counterparty

Hong Kong listing, scale and balance sheet facilitate good access to capital

Responsible observance of stakeholder interests and our commitment to good corporate governance and CSR

Appendix: Understanding Our Core Market

As in 2017 Annual Report

Pacific Basin

The Dry Bulk Sector

Bulk Carriers for dry bulk commodities

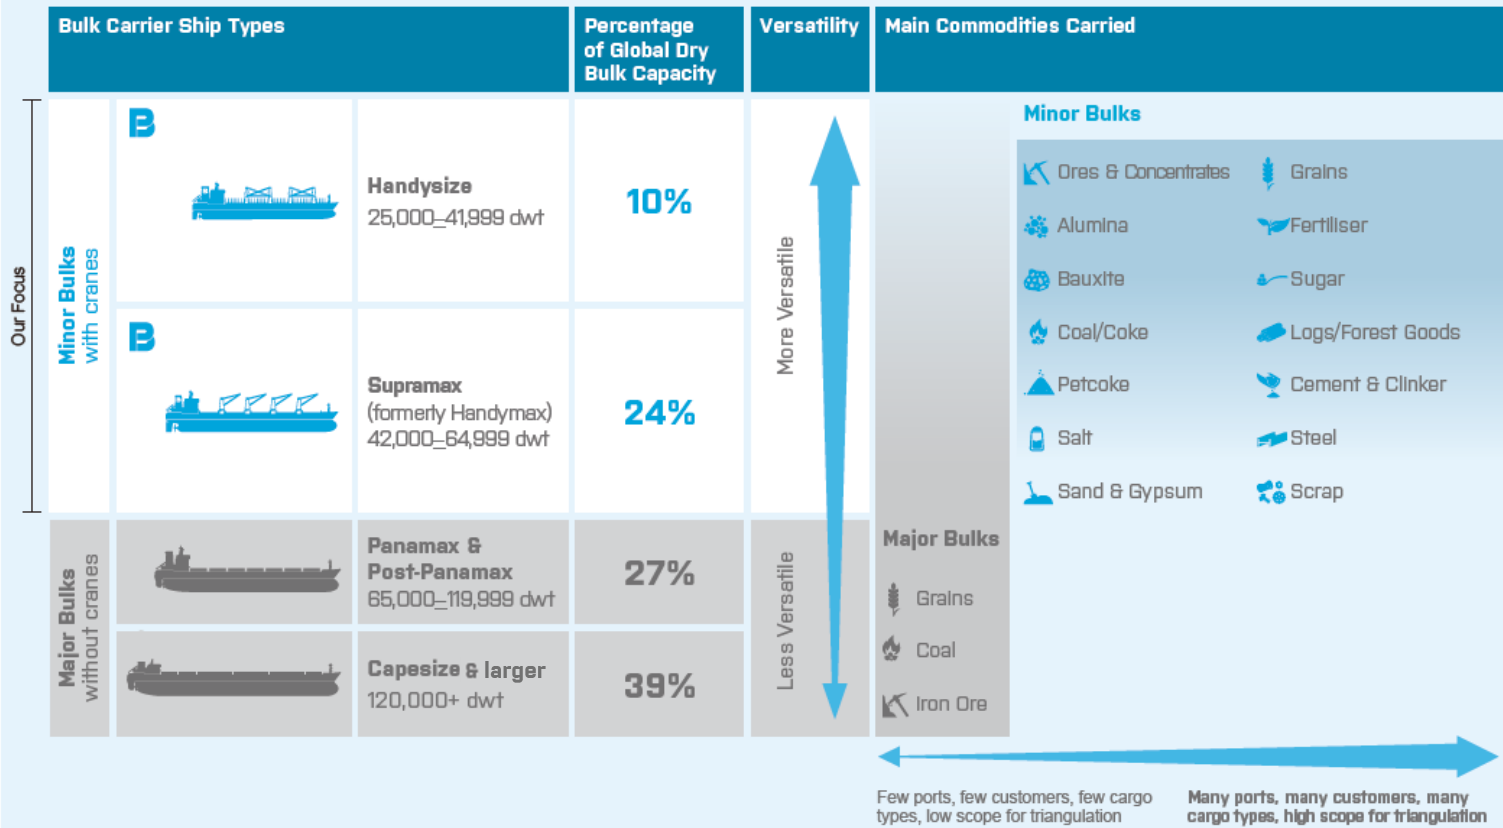

Other Mainstream Shipping Sectors

Tankers for oil, gas & chemicals

Containerships for containerised goods

Full Year 2017 Global Dry Bulk Trade (Volume) = 5.1 Billion Tonnes (+4% YOY)

- ✓ Minor Bulks & Grain is 47% of total Dry Bulk demand
- ✓ Pacific Basin focuses on these growing markets

- More diverse customer, cargo and geographical exposure enables high utilisation
- A segment where scale and operational expertise make a difference
- Better daily TCE earnings driven by a high laden-to-ballast ratio
- Sound long-term demand expectations and more modest fleet growth

Our Dry Bulk Cargo Volumes in 1Q 2018 (1 Jan – 28 Mar)

- Diverse range of commodities reduces product risk
- China and North America were our largest markets
- About 60% of business in Pacific and 40% in Atlantic

approx. **500**
customers

Appendix: New Regulations

New Regulations	Content	Impact on the Industry	PB actions
IMO Ballast Water Treatment - Installation required at first dry-docking after 8 Sep 2019	<ul style="list-style-type: none"> International Maritime Organization (IMO) requires ballast water treatment equipment (BWTS) to be fitted on all ships US Coast Guard requires all ships sailing to US to use approved BWTS 	<ul style="list-style-type: none"> Increased capex for existing shipowners Increased potential scrapping 	<ul style="list-style-type: none"> System selected, pending US Coast Guard approval Installation in 2018-2023 for our owned vessels
Low Sulphur Emissions Cap - 1 Jan 2020 	<ul style="list-style-type: none"> IMO has set a global 0.5% sulphur limit for marine fuel oil, effective 2020 (in addition to existing 0.1% sulphur limit in Emission Control Areas) Exception: Shipowners can use higher sulphur fuel if they fit scrubbers (costing several million US\$) to clean exhaust gas 	<ul style="list-style-type: none"> Low sulphur fuel is more expensive <ul style="list-style-type: none"> Increased demand for low sulphur fuel Decreased demand for heavy fuel oil More slow-steaming contribute to better supply-demand balance Increased capex (if installing scrubbers) Uncertainty of ship design should hold back newbuild ordering Increased potential scrapping <p>Low uptake of scrubbers expected by 2020</p>	<ul style="list-style-type: none"> We do NOT think sulphur scrubbers are an effective solution neither technically nor environmentally Much prefer a mandate to use low sulphur fuel which would support a level playing field, lower speeds and lower emissions (incl. CO₂)

We believe the new regulations will penalise poor performers and older ships while benefitting stronger companies with high quality ships that are better positioned to adapt and cope practically and financially with compliance

Appendix: We Will Not Order More Newbuildings Today

- Market does not need more newbuildings
 - Extra capacity remains in the global fleet through potentially higher operating speed
 - Limited efficiency benefits from newbuildings compared to good quality Japanese-built secondhand ships
- The industry needs a more reasonable level of profitability
- Risk and payback time for newbuildings is currently excessive due to several uncertainties
 - How best to comply with the global sulphur emissions cap from 2020
 - Which ballast water treatment system to install
 - Questions about the future price, types and availability of fuel
 - Potential additional new regulations (e.g. NO_x and CO₂ emissions, etc)
 - Faster and potentially more significant technological developments in the longer term
- Attractive secondhand prices compared to newbuilding prices
- New accounting rules requiring time charters to be capitalised from 2019

Discouraging
new ship
ordering

US\$m	2017	2016	Change
EBITDA	133.8	22.8	+111.0

Appendix: Atlantic Rates Stronger than Pacific

Handysize (BHSI)

Supramax (BSI) #

- Atlantic market driven by strong South American grain exports and US coal exports pushing Atlantic earnings to outperform the Pacific in 2017
- Pacific earnings peaked in Oct17 and have since declined impacted by Chinese anti-pollution policy reducing some industrial activities and, more recently, the coming of the Lunar New Year.

* excludes 5% commission

BSI is now based on a standard 58,000 dwt bulk carrier
Source: Baltic Exchange, data as at 10 Apr 2018

Dry Bulk Trade Volumes

Key Drivers in 2017

- Stronger seaborne trade growth apparent across most dry bulk cargo categories – both major and minor bulks
- Stronger Chinese industrial activity
- Record South American grain exports
- Longer trade distances supported stronger seaborne tonne-mile demand (5.1%)
- Reduced steel and cement shipments primarily due to strong Chinese domestic demand limiting export

Long-Term Trends

- Strong world GDP (+3.7%*) – highly correlated with dry bulk demand growth
- Continued strong grain demand for animal feed due to shift towards meat-based diet
- Strong industrial growth and infrastructure investment in China and Asian countries
- Environmental policy in China encouraging shift from domestic to imported supply of resources

* 2017E: 3.7%; 2018E: 3.9%

1Q18 Trading Update

- **Applying sustainable thinking in our decisions and the way we run our business**
- **Creating long-term value through good corporate governance and CSR**

2017 CSR Report 
www.pacificbasin.com/ar2017

Corporate Social Responsibility (CSR)

- Guided by strategic objectives on (i) workplace practices (primarily safety), (ii) the environment, and (iii) our communities (where our ships trade and our people live and work)
- Active approach to CSR, with KPIs to measure effectiveness
- Reporting follows SEHK's ESG Reporting Guide
- Disclosure also through CDP, HKQAA, CFR for HK-listed companies

Corporate Governance & Risk Management

- Adopted recommended best practices under SEHK's CG Code (with quarterly trading update)
- Closely integrated Group strategy and risk management
- Transparency priority
- Stakeholder engagement includes in-depth customer and investor surveys
- Risk management committee interaction with management and business units
- Integrated Reporting following International <IR> Framework of IIRC

Appendix: Convertible Bonds Due 2021
