

Pacific Basin

J.P. Morgan's Asia Infrastructure, Industrials & Transportation Forum
Hong Kong, 26 June 2019

Overview

Pacific Basin

Pacific Basin Overview

- World's largest owner and operator of modern Handysize & Supramax ships
- Cargo system business model – consistently outperforming market rates
- Own 114* Handysize and Supramax vessel, with total 230+ dry bulk ships on the water serving major industrial customers around the world
- Hong Kong headquartered and HKEx listed, 12 offices worldwide, 336 shore-based staff, 3,800+ seafarers#
- Strong balance sheet with US\$2.4bn+ total assets and US\$340mn+ cash
- Our vision: To be a shipping industry leader and the partner of choice for customers, staff, shareholders and other stakeholders

Pacific Basin business principles
and our Corporate Video

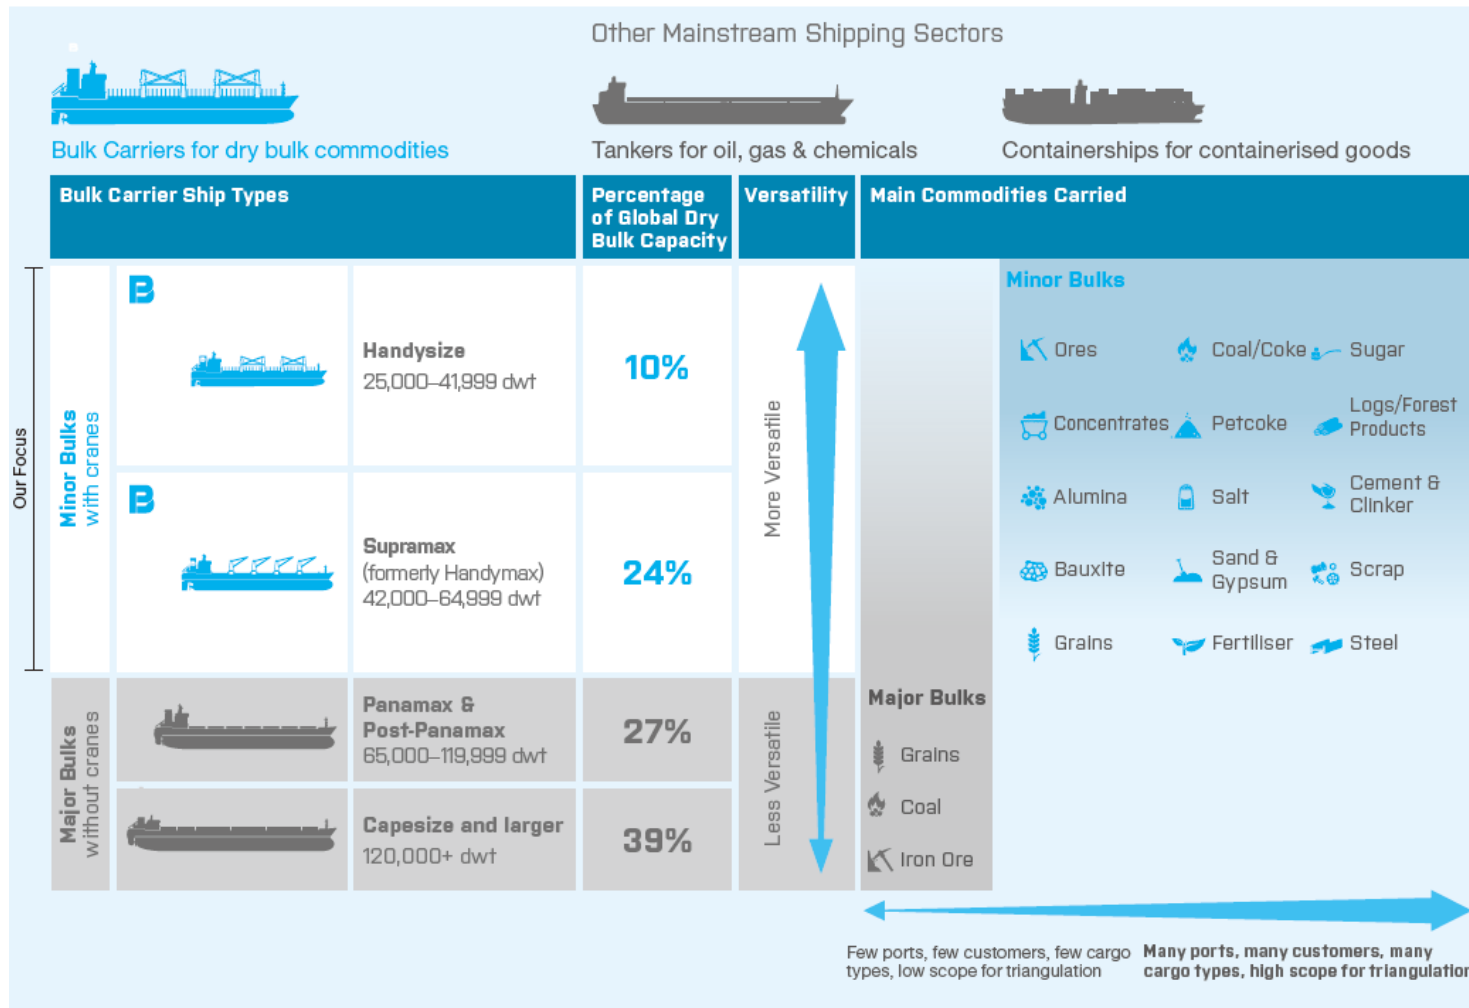

* Including 3 vessels purchased and scheduled to deliver in next 3 months

As at January 2019

Understanding Our Core Market

The Dry Bulk Sector

Pacific Basin Dry Bulk – Diversified Cargo

Our Dry Bulk Cargo Volumes in 1Q19

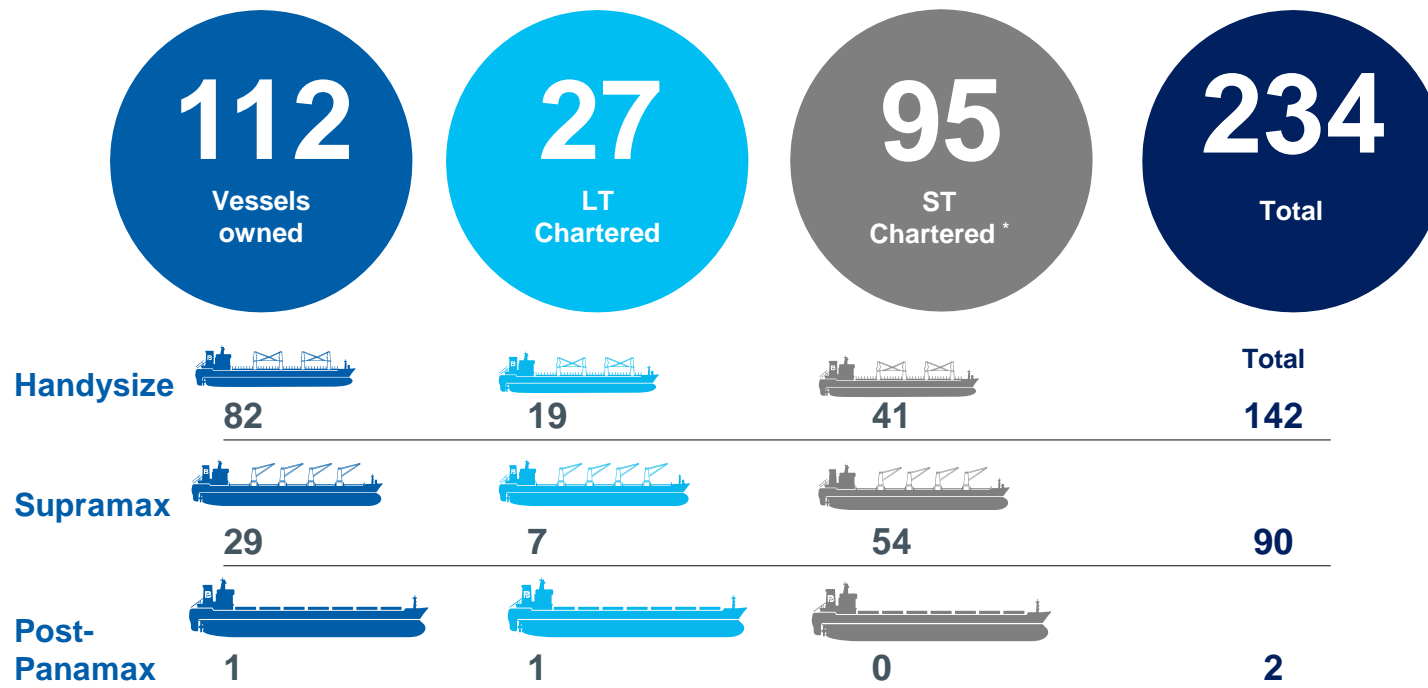

- Diverse range of commodities reduces product risk
- China and North America were our largest markets
- About 60% of business in Pacific and 40% in Atlantic

approx. **500**
customers

Fleet List – 31 March 2019

www.pacificbasin.com
Our Fleet

Average age of core fleet: 8 years old

An additional 3 vessels purchased and scheduled to deliver in next 3 months

** Average number of short-term + index-linked vessels operated in March 2019*

**2019 First Quarter Trading Update,
Market Review and Outlook**

Strong PB Performance Despite Market Headwinds

Cover as at 8 April 2019

	US\$/day	Handysize	Supramax
1Q	Market (BHSI/BSI) index net rate	5,730	7,540
	PB daily TCE net rate	9,080	10,400
	PB outperformance	58% / 3,350	38% / 2,860
2Q-4Q	PB daily TCE net cover rate	9,360	10,690
	% cover for remaining contracted days	36%	58%
FY	PB daily TCE net cover rate	9,210	10,550
	% of contracted days covered	55%	73%

BHSI (Handysize) and BSI (Supramax) down 29% and 26% YOY respectively vs PB Handysize and Supramax TCE down by 3% and 8% YOY respectively

We operated 220 ships overall during 1Q and our owned fleet will increase to 115 by July 2019:

- In 1Q19, we took delivery of 3 vessels (2 committed in May 18, 1 committed at end 18) and we completed the sale of an older small Handysize
- YTD, we have committed to purchase for cash a further 3 modern secondhand Supramax vessels

Market has Experienced a Weak Start in 2019

**Baltic Handysize Index (BHSI)
Market Spot Rates in 2016-2019**

**Baltic Supramax Index (BSI)
Market Spot Rates in 2016-2019**

- Weak start to the year due to usual seasonal weakness with a more pronounced CNY dip compounded by :
 - US-China trade conflict
 - Chinese restrictions on coal imports and other custom clearance issues (e.g. canola oil seeds)
 - Iron ore infrastructure disruptions in Brazil and weather disruptions in Australia
- Handysize and Supramax market improved significantly during second half of 1Q
- In contrast, larger Capesize vessel segment saw little recovery and continued to weaken through 1Q. Decreasing correlation between Capesize and smaller vessel segments

* excludes 5% commission

Minor Bulk Expected to Drive Demand in 2019

Overall Dry Bulk Tonne-miles Demand Growth Since 2010

Annual Change in Dry Bulk Tonne-miles Demand

- In January and February 2019:
 - 7 key minor bulk commodities (including grain) into China grew 7% YOY
 - Chinese iron ore and coal imports declined 3% YOY
- We expect continued growth in minor bulk demand and grain to bounce back
- A resolution to trade tensions would provide a welcome boost to the market
- Minor bulk demand expected to grow 4.2% in 2019

- 1 China reducing US grain buying
- 2 Iron ore disruptions
- 3 Versatile minor bulk less exposed to trade disruption

New Regulations Benefitting Stronger Companies

New Regulations	Content	Impact on the Industry	PB actions
IMO Ballast Water Treatment: Installation required at first dry-docking after 8 Sep 2019	<ul style="list-style-type: none"> IMO and USCG requirement 	<ul style="list-style-type: none"> Capex for shipowners Increased scrapping 	<ul style="list-style-type: none"> 14 PB owned vessels fitted Retrofitting 97 owned vessels with system based on filtration and electrocatalysis Completion in 2022
Sulphur Emissions Cap: 1 Jan 2020 	<ul style="list-style-type: none"> IMO global 0.5% sulphur cap requires: <ul style="list-style-type: none"> i) low-sulphur fuel or; ii) exhaust gas cleaning systems (“scrubbers”) 	<ul style="list-style-type: none"> Majority of global fleet (esp. Handysize) will comply using low-sulphur fuel →slow-steaming and tighter supply Larger vessels (incl. some Supramaxes) installing scrubbers →docking ships for several weeks for scrubber retrofit 	<ul style="list-style-type: none"> Cannot risk being competitively disadvantaged Arrangements in place with yards and scrubber makers to install scrubbers on Supramaxes Fitting and testing scrubbers to gain experience early
IMO greenhouse gas emissions reduction 	<ul style="list-style-type: none"> Cut total greenhouse gas emissions from shipping by at least 50% by 2050 (compared to 2008), requiring efficiency improvements of at least 40% by 2030 and 70% by 2050 	<ul style="list-style-type: none"> Reducing speed Development of new fuels, engine technology and vessel designs Discouraging new ship ordering in short and medium term Increased scrapping 	<ul style="list-style-type: none"> No newbuild ordering Monitoring new technology and designs

Favourable Minor Bulk Supply and Demand Outlook

Total Dry Bulk Supply and Demand

- 2019 weak start – trade war uncertainty and Chinese import policies
- Attractive supply fundamentals in our segments with supply disruptions expected approaching IMO 2020
- Factors other than supply and demand can also drive rates: bunker prices and speed, off-hire, congestion, sentiment, etc.

* Major Bulk includes iron ore, coal and grains
Source: Clarksons Research, as at April 2019

Minor Bulk Demand and Handysize/Supramax Supply

Major Bulk* Demand and Capesize/Panamax Supply

Secondhand Values Remain Attractive

- Large gap between newbuilding and secondhand prices and uncertainty over future ship designs due to upcoming IMO CO₂ regulations discourage new ship ordering
- Upside in secondhand values

Secondhand 5 years old benchmark Handysize and Supramax vessels defined as 37,000 dwt (up from 32,000 dwt since Jan 19) and 58,000 dwt (up from 56,000 dwt since Jan 19) respectively

Source: Clarksons Research, as at 7 Jun 2019

Uncertain Short-term Outlook but Long-term Fundamentals Remain Positive

Market is now softening as it did same time last year, and the global growth outlook has been revised downwards. Some key factors are likely to make the remaining market more volatile this year:

- IMF's current 2019 GDP forecast of 3.3% still represents a healthy level of growth (despite reduction from 3.9% in Oct18)
 - Continues to bode well for minor bulk tonne-mile demand
 - IMF expects global economy to slowly strengthen in 2H19 and into 2020 supported by Chinese economic stimulus and continued loose monetary policy in US
- A resolution to the trade conflict between US and China would provide a welcome boost to the market
- IMO 2020 sulphur preparations should lead to increased supply disruptions in 2H, which could compound dry bulk market strength that typically builds in 3Q and 4Q
- Clarksons estimates minor bulk demand growth of 4.3% in 2019 vs Handysize/Supramax net fleet growth of 1.9% for 2019 and 1.6% for 2020

Despite short term volatility and in view of the combination of continued healthy growth in minor bulk demand and reducing Handysize and Supramax fleet growth, we continue to believe that the longer term fundamentals for our vessel segments are positive

Financial Review

Significant Improvement in 2018 Financial Results

As at 31 December 2018

Strategy and Position

Pacific Basin

Our Business Model Continues to Outperform

Our business model has been refined over many years. We are able to generate a TCE earnings premium over market rates because of our high laden percentage (minimum ballast legs), which is made possible by a combination of:

- Fleet scale
- High-quality interchangeable ships
- Experienced staff
- Global office network
- Cargo contracts, relationships and direct interaction with end users
- High proportion of owned vessels facilitating greater control and minimising trading constraints
- Versatile ships and diverse trades in minor bulk

TCE Outperformance Compared to Market in Last 5 Years

US\$1,910

Daily Handysize Premium

US\$1,430

Daily Supramax Premium

Competitive at Every Level

1	TCE/day	<ul style="list-style-type: none"> Outperforming indexes and most companies who report publicly Cargo focused business model with 90% plus laden percentage 	
2	Opex/day	<ul style="list-style-type: none"> US\$3,850*/day in 2018 Scale, focus and sister ship effects In-house management 	
3	G&A/day	<ul style="list-style-type: none"> Scale benefits and efficient systems US\$740/day spread over both owned and chartered ships in 2018 	
4	Capital Cost/day	<ul style="list-style-type: none"> Focused on good quality, predominantly Japanese-built secondhand ships Fleet financed through long-term secured facilities at industry leading cost 	

* US\$3,850*/day is 2018 blended daily opex cost of Handysize and Supramax

Our Strategic Direction and Priorities

- **Maintain and grow our cargo focus and scale**
- **Continue to be both a fully integrated owner and operator**
 - Not only owned ships, not only asset light
- **Maintain empowered local chartering and operations close to customers**
 - With best in class centralised support & systems
- **Keep building our brand**
 - Long term thinking, safety, care and quality in everything we do
- **Continue to grow our owned fleet with quality second hand acquisitions**
- **Opportunistically trading up smaller older ships to larger younger ships**
- **Avoid buying newbuildings**
 - due to high price, low return, and new regulations will change technology
- **Continue to reduce long term charters**
 - Replace with owned ships, and medium and short term chartered in ships
- **Thorough preparations for IMO 2020**
 - Fuel contracts, cleaning of tanks, installation and testing of scrubbers, new clauses
- **Keep our balance sheet strong**

12 local dry bulk offices

24/7 support

Our Record

Trusted and transparent

Strong public balance sheet and track record

Award winning CSR policy and environmental focus

Our Fleet

Managed In-house and Highly Versatile

Modern quality ships with the best-in-class design

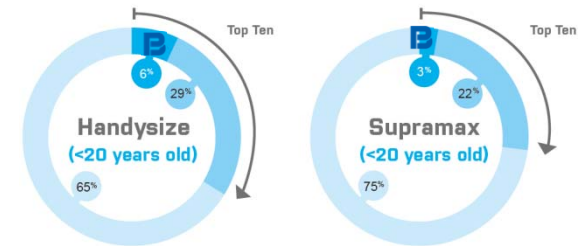

Low breakeven cost and fuel efficient

Our Worldwide Network and Trading Areas

Our Market Shares

We operate approx. 6% of global 25-42,000 dwt Handysize ships of less than 20 years old; and approx 3% of global 42-65,000 dwt Supramax of less than 20 years old

MARKET-LEADING CUSTOMER FOCUS & SERVICE

Priority to build and sustain long-term customer relationships

Solution-driven approach ensures accessibility, responsiveness and flexibility towards customers

Close partnership with customers generates enhanced access to spot cargoes and long-term cargo contract opportunities of mutual benefit

LARGE FLEET & MODERN VERSATILE SHIPS

Fleet scale and interchangeable high-quality ships facilitate service flexibility for customers, optimised scheduling and maximised vessel and fleet utilisation

In-house technical operations facilitate enhanced health & safety, quality and cost control, and enhanced service reliability and seamless integrated service and support for customers

COMPREHENSIVE GLOBAL OFFICE NETWORK

Integrated international service enhanced by experienced commercial and technical staff around the world

Being local facilitates clear understanding of and response to customers' needs and first-rate personalised service

Being global facilitates comprehensive market intelligence and cargo opportunities, and optimal trading and positioning of our fleet

STRONG CORPORATE & FINANCIAL PROFILE

Striving for best-in-class internal and external reporting, transparency and corporate stewardship

Strong cash position and track record set us apart as a preferred counterparty

Hong Kong listing, scale and balance sheet facilitate good access to capital

Responsible observance of stakeholder interests and our commitment to good corporate governance and CSR

- 30% MCR = 9.2knots
- 50% MCR = 11knots
- 70% MCR = 12knots
- 85% MCR = 13.2knots

Appendix: Dry Bulk Outlook in the Medium Term

Possible Market Drivers in the Medium Term

Opportunities

- Continued strong industrial growth and infrastructure investment in emerging markets and China, boosted by economic stimulus, enhancing demand for dry bulk shipping
- Easing of US-China trade tariffs and restrictions resulting in improved sentiment and dry bulk trade activity
- Environmental policy in China encouraging shift from domestic to imported supply of resources
- Limited newbuilding ordering and deliveries supporting tighter supply in the medium term
- Environmental maritime regulations encouraging increased ship scrapping from current minimal levels and discouraging new ship ordering
- Supply contraction due to slower operating speed of ships burning more expensive low-sulphur fuel and time out of service for ships installing scrubbers to meet the IMO 2020 sulphur cap
- Expanding thermal coal imports into emerging south and south-east Asian countries

Threats

- Slowing global economic growth affecting the trade in dry bulk commodities
- Reduction in Chinese industrial growth and investments impacting demand for dry bulk shipping
- Environmental policy in China encouraging greater shift to renewable energy, possibly impacting coal imports
- Escalating trade disputes impacting global GDP growth, weakening sentiment and undermining dry bulk demand
- Excessive new ship ordering if the price gap between newbuilding and secondhand ships closes
- Periods of low fuel prices supporting faster ship operating speeds which increases supply
- Iron ore infrastructure disruptions in Brazil impacting global iron ore tonne-mile trade flows

- **Applying sustainable thinking in our decisions and the way we run our business**
- **Creating long-term value through good corporate governance and CSR**

2018 CSR Report 
www.pacificbasin.com/ar2018

Corporate Social Responsibility (CSR)

- Guided by strategic objectives on (i) workplace practices (primarily safety), (ii) the environment, and (iii) our communities (where our ships trade and our people live and work)
- Active approach to CSR, with KPIs to measure effectiveness
- Reporting follows SEHK's ESG Reporting Guide
- Disclosure also through CDP, HKQAA, CFR for HK-listed companies

Corporate Governance & Risk Management

- Adopted recommended best practices under SEHK's CG Code (with quarterly trading update)
- Closely integrated Group strategy and risk management
- Transparency priority
- Stakeholder engagement includes in-depth customer and investor surveys
- Risk management committee interaction with management and business units
- Integrated Reporting following International <IR> Framework of IIRC

Appendix: Convertible Bonds Due 2021
