Robust Business Model
Versatile Fleet
Passionate Team

25th CLSA Investors' Forum
Hong Kong, 10-11 Sep 2018
Pacific Basin Overview

- World’s largest owner and operator of modern Handysize & Supramax ships
- Cargo system business model – consistently outperforming market rates
- Own 108* Handysize and Supramax vessel, with total 220+ dry bulk ships on the water serving major industrial customers around the world
- Hong Kong headquartered and HKEx listed, 12 offices worldwide, 335 shore-based staff, 3,400+ seafarers#
- Strong balance sheet with US$2bn+ total assets and US$300mn+ cash
- Our vision: To be a shipping industry leader and the partner of choice for customers, staff, shareholders and other stakeholders

* An additional 3 vessels we purchased will deliver in 2H18 and early 2019
# As at Jul 2018
# Understanding Our Core Market

## The Dry Bulk Sector

Ore Carriers serve many ports, many customers, many cargo types, high scope for triangulation. Major bulk carriers serve few ports, few customers, low scope for triangulation.

Tankers for oil, gas & chemicals

Containerships for containerised goods

Other Mainstream Shipping Sectors
Why Handysize and Supramax?

Why Minor Bulk?

Full Year 2017 Global Dry Bulk Trade (Volume) = 5.1 Billion Tonnes (+4% YOY)

- 29% Iron Ore
- 24% Coal
- 10% Grain & Soybean
- 37% Minor Bulk

- Minor Bulks & Grain is 47% of total Dry Bulk demand
- Pacific Basin focuses on these growing markets

- More diverse customer, cargo and geographical exposure enables high utilisation
- A segment where scale and operational expertise make a difference
- Better daily TCE earnings driven by a high laden-to-ballast ratio
- Sound long-term demand expectations and more modest fleet growth

Source: Clarksons Research, 1 Feb 2018
Diverse range of commodities reduces product risk
China and North America were our largest markets
About 60% of business in Pacific and 40% in Atlantic
Our business model has been refined over many years. We are able to generate a TCE earnings premium over market rates because of our high laden percentage (minimum ballast legs), which is made possible by a combination of:

- Our fleet scale
- High-quality interchangeable ships
- Experienced staff
- Global office network
- Our cargo contracts, relationships and direct interaction with end users
- Our fleet has a high proportion of owned vessels facilitating greater control and minimising trading constraints
- Our segment's versatile ships and diverse trades

**Our TCE Outperformance Compared to Market in Last 5 Years**

Market Review
Freight Market Continues to Improve

- YTD 2018 freight indices have followed a similar seasonal pattern as last year at improved levels
- Broad based economic growth driver of dry bulk demand
- Key positive drivers through the 1H included improved Brazilian and US grain exports. US coal exports also grew strongly to a five-year high
- Pacific demand benefited from increased trade in bauxite, nickel ore, copper concentrate, forestry products and other minor bulks in which we specialise. In 1H18, Chinese electricity generation grew 9% yoy, and Chinese steel exports declined 14% due to strong domestic demand

*Excludes 5% commission

BSI is now based on a standard 58,000 dwt bulk carrier

Source: Baltic Exchange, data as at 3 Sep 2018
2018 Demand is Forecast to Grow 3.2% with Minor Bulks at +4.0%

Annual change dry bulk demand
Bn tonne-miles

Less than 2017 but comfortably above supply

Iron ore +2.5%
Coal +4.2%
Grain +1.5%
Minor bulk +4.0%

Demand Growth Since 2010

Forecast for 2018 is moderate

Source: Clarkson Research, 1 Aug 2018
Newbuilding Deliveries Continue to Reduce

- 1.6% net fleet growth in 1H18 (1.9% deliveries less 0.3% scrapping)
- Very limited ordering in Handysize and Supramax (historically low 1.3% of fleet) + continued orderbook delivery shortfall ➔ should result in continued low new ship deliveries in coming years

**Dry Bulk Supply Development**

**Total Ordering vs Existing Fleet**

**Panamax/Capesize Ordering (above 65,000 dwt)**

**Handysize/Supramax Ordering (10-64,999 dwt)**

## New Regulations

<table>
<thead>
<tr>
<th>New Regulations</th>
<th>Content</th>
<th>Impact on the Industry</th>
<th>PB actions</th>
</tr>
</thead>
</table>
| IMO Ballast Water        | - International Maritime Organization (IMO) requires ballast water treatment equipment (BWTS) to be fitted on all ships  
- US Coast Guard requires all ships sailing to US to use approved BWTS                                                                 | - Increased capex for existing shipowners  
- Increased potential scrapping                                                                 | - 9 owned vessels are fitted with BWTS  
- Committed to retrofit 50 owned vessels with a system based on filtration and electrocatalysis  
- Negotiating BWTS systems for remaining 50+ owned vessels  
- Well positioned to complete implementation by 2023                                                                 |
| Emissions Cap: 1 Jan 2020| - IMO has set a global 0.5% sulphur limit for marine fuel oil, effective 2020 (in addition to existing 0.1% sulphur limit in Emission Control Areas)  
- Exception: Shipowners can use higher sulphur fuel if they fit scrubbers (costing several million US$) to clean exhaust gas | - Low sulphur fuel is more expensive  
- Increased demand for low sulphur fuel  
- Decreased demand for heavy fuel oil  
- More slow-steaming contribute to better supply-demand balance  
- Increased capex (if installing scrubbers)  
- Uncertainty of ship design should hold back newbuild ordering  
- Increased potential scrapping  
Low uptake of scrubbers expected by 2020                                                                 | - We lobbied for a mandate for all ships to burn low sulphur fuel since this would support a level playing field, lower speeds and lower emissions (incl CO2)  
- However, it appears there is now no scope to change the rules, and some owners of larger vessels (incl. some Supramax owners) are planning to install scrubbers  
- We are assessing both the low sulphur fuel and scrubber options, but continue to believe the majority of the dry bulk fleet (especially smaller ships like Handysize) will comply by using low sulphur fuel                                                                 |
| Reducing carbon and green| - IMO announced to cut total carbon and greenhouse gas emissions from shipping by at least 50% by 2050 (compared to 2008), requiring average efficiency improvements of at least 40% by 2030 and 70% by 2050 | - Reducing speed of vessels to reduce emission contribute to better supply-demand balance  
- Development of new fuels, engine technology and vessel designs  
- Increased potential scrapping                                                                 | - Holding back ordering of new ships and closely monitoring the development of new technology and designs |

We believe the new regulations will penalise poor performers and older ships while benefitting stronger companies with high quality ships that are better positioned to adapt and cope practically and financially with compliance.
Favourable Dry Bulk Supply and Demand Outlook

- Clarksons Research estimate dry bulk shipping tonne-mile demand improved 1% yoy in 1Q18 (2.1% on an overall demand basis)
- 2Q18 expected to show further improvement, and even stronger improvement in minor bulk segment
- Clarksons Research estimate in FY18:
  - 3.2% tonne-mile demand growth
  - 2.7% net fleet growth (3.3% deliveries – 0.6% scrapping)
- Actual deliveries expected to be around 27m dwt compared to 38m dwt in 2017
- Progressively fewer new ships will deliver from shipyards in 2018 and 2019

Source: Clarksons Research, as at 1 Aug 2018
Improved freight market conditions supported sale and purchase activity and increased vessel values.

However, gap between newbuilding and secondhand prices continues to discourage new ship ordering.

We see upside in secondhand values.

Source:Clarksons Research, as at 31 Aug 2018
Financial and Operating Review
Better minor bulk market rates combined with our continued outperformance and competitive cost structure supported much improved results

We have declared an interim dividend of HK2.5¢/share

We secured a US$325m revolving credit facility that significantly extends our repayment profile and lowers our finance costs

We acquired 5 modern vessels including 4 funded 50% by equity, which will grow our owned fleet to 111 ships

Trade dispute actions to date impact only a small fraction of trades in which we are engaged, but an escalating global trade war could impact global GDP and dry bulk demand

We remain cautiously optimistic for a continued market recovery, with some volatility along the way

---

- Vessel average net book value: Handysize $14.9m (10.3 years); Supramax $21.9m (6.5 years)
- KPI: maintain net gearing below 50%
Outlook and Strategy
Our business model has been refined over many years. We are able to generate a TCE earnings premium over market rates because of our high laden percentage (minimum ballast legs), which is made possible by a combination of:

- Our fleet scale
- High-quality interchangeable ships
- Experienced staff
- Global office network
- Our cargo contracts, relationships and direct interaction with end users
- Our fleet has a high proportion of owned vessels facilitating greater control and minimising trading constraints
- Our segment's versatile ships and diverse trades
Well Positioned for a Recovering Market

Our TCE Outperform Market

Average PB premium over market indices in last 5 years:

- US$1,850/day Handysize TCE
- US$1,290/day Supramax TCE

More Owned Vessels with Fixed Costs

- Owned Vessel Breakeven Incl. G&A overheads
  - US$8,300/day Handysize\(^1\)
  - US$9,000/day Supramax\(^2\)

Efficient Cost Structure

- Annual Group G&A Overheads
  - US$75.7m
  - Annualised US$57m

- Daily Vessel Operating Expenses (Combined Handysize and Supramax)
  - US$4,370 2014
  - US$3,810 1H18

Sensitivity toward Market Rates*

- Market Rate
  - +/- US$1,000 daily TCE

Our Underlying Result

- +/- US$35-40m

---

\(^1\) 1H18 PB owned Handysize $7,380/day + G&A overheads $900/day = US$8,300/day

\(^2\) 1H18 PB owned Supramax $8,090/day + G&A overheads $900/day = US$9,000/day

\(^3\) An additional 3 vessels we purchased will deliver in 2H18 and early 2019

* Based on current fleet and commitments, and all other things being unchanged
Our Outlook and Strategy

Outlook

- Minor bulk freight market strengthened again in the 1H18, the favourable outlook for widely-spread global GDP growth bodes well for dry bulk demand, and supply fundamentals are now more positive
- Possible market drivers in the medium term:
  - Positive economic growth and commodity demand outlook, low deliveries, and new regulations discouraging new ship ordering
  - Risk of reduced Chinese coal and ore imports, trade tariffs and trade conflict escalation impacting dry bulk demand; increased new ship ordering and faster ship operating speeds
- We are cautiously optimistic for a continued market recovery, although with some volatility along the way

Strategy – Well Positioned for a Recovering Market

- Continue to focus on our world-leading Handysize and Supramax business
- Maximise our fleet utilisation and TCE earnings by combining minor bulk characteristics with our large fleet of substitutable ships and global office network
- Continue to look at good quality secondhand ship acquisition opportunities
- No newbuildings in the medium term, we will watch technological and regulatory developments closely
- Healthy cash and net gearing positions enhance our corporate profile as a preferred, strong, reliable, safe partner for customers and other stakeholders

Our People

- Close to you
- 12 local dry bulk offices
- 24/7 support

Our Record

- Trusted and transparent
- Strong public balance sheet and track record
- Award winning CSR policy and environmental focus

Our Fleet

- Managed In-house and Highly Versatile
- Modern quality ships with the best-in-class design
- Low breakeven cost and fuel efficient

Our Worldwide Network and Trading Areas

Our Market Shares

- **Handysize (<20 years old)**: 37%
- **Supramax (<20 years old)**: 24%

We operate approx. 7% of global 25-42,000 dwt Handysize ships of less than 20 years old; and approx 3% of global 50-65,000 dwt Supramax of less than 20 years old
Appendix: Strategic Model

MARKET-LEADING CUSTOMER FOCUS & SERVICE
Priority to build and sustain long-term customer relationships
Solution-driven approach ensures accessibility, responsiveness and flexibility towards customers
Close partnership with customers generates enhanced access to spot cargoes and long-term cargo contract opportunities of mutual benefit

LARGE FLEET & MODERN VERSATILE SHIPS
Fleet scale and interchangeable high-quality ships facilitate service flexibility for customers, optimised scheduling and maximised vessel and fleet utilisation
In-house technical operations facilitate enhanced health & safety, quality and cost control, and enhanced service reliability and seamless integrated service and support for customers

COMPREHENSIVE GLOBAL OFFICE NETWORK
Integrated international service enhanced by experienced commercial and technical staff around the world
Being local facilitates clear understanding of and response to customers’ needs and first-rate personalised service
Being global facilitates comprehensive market intelligence and cargo opportunities, and optimal trading and positioning of our fleet

STRONG CORPORATE & FINANCIAL PROFILE
Striving for best-in-class internal and external reporting, transparency and corporate stewardship
Strong cash position and track record set us apart as a preferred counterparty
Hong Kong listing, scale and balance sheet facilitate good access to capital
Responsible observance of stakeholder interests and our commitment to good corporate governance and CSR
Appendix: Dry Bulk Demand in 2018

Key Drivers in 1H18

- Broad based economic recovery seen through increased steel output, also outside China
- US coal exports grew strongly
- Stronger minor bulk demand in Atlantic driven by Brazilian and US agricultural exports; Pacific demand benefited from increased trade in bauxite, nickel ore, copper concentrates and forestry products and other minor bulks in which we specialise

Longer-Term Trends beyond 2018

- Solid world GDP (+3.9%*) – main driver for dry bulk demand growth
- Continued growth in grain demand for animal feed due to shift towards meat-based diet
- Trade disputes between US and its key trading partners appear so far to have had only limited impact on agricultural and steel trade volumes globally, but an escalating global trade war could impact global GDP and dry bulk demand
- Government policy in China and India could affect coal trades - up or down

2018 tonne-mile effect

- Longer average distances are forecast to supplement volume growth by an additional 0.6%, generating total demand growth of 3.2% (+4% for minor bulk)

* 2017: 3.8%; 2018E: 3.9%; 2019E: 3.9%

Appendix: Extended Repayment Profile and Reduced Cost of Funding

As at 30 June 2018

Cash Flow in 1H18

- Cash and deposit balance
- Cash inflow
- Cash outflow

Schedule of Repayments of Borrowings

- Secured borrowings (US$855m)
- Convertible bond (face value US$125m), book value US$119m, maturity July 2021

In June, we closed a new US$325m syndicated 7-year reducing revolving credit facility secured against 50 ships (including 9 un-mortgaged vessels) at Libor +1.5%. The facility refinanced 6 existing committed loan facilities and raised an additional US$136m in available funding. Upon closing, the facility was fully drawn.

- **US$317m**
  - Cash & Deposits

- **6 vessels**
  - Unmortgaged (approx. US$120m market value)

- **US$50m Capex**
  - 3 secondhand Vessels in 2H18 & 2019

- 3.8%
  - Average Cash Interest Rate

1 Including 3 vessels to be delivered in 2H18 and early 2019
2 US$50m Capex = US$13.5m in cash + US$36.5m in shares
Appendix:
Dry Bulk Outlook in the Medium Term

Possible market drivers in the medium term

**Opportunities**
- Strong industrial growth and infrastructure investment in China and beyond enhancing demand for dry bulk shipping
- Positive and widely spread growth outlook for all major economic areas
- Continued strong grain demand primarily for animal feed due to shift towards meat-based diet
- Environmental policy in China encouraging shift from domestic to imported supply of resources
- Environmental maritime regulations encouraging ship scrapping from current minimal levels and discouraging new ship ordering
- Low newbuilding deliveries in the medium term
- Periods of higher fuel oil prices encouraging slower ship operating speeds which decreases supply and emissions
- Expanding thermal coal imports into emerging south and southeast Asian countries

**Threats**
- Reduction in Chinese industrial growth and investments impacting demand for dry bulk shipping
- Environmental policy in China encouraging greater shift to renewable energy, possibly impacting coal imports
- Trade tariffs between US and its major trading partners resulting in short-term reduction in trade volumes while importers seek alternate commodity sources
- Escalating trade disputes impacting global GDP growth, weakening sentiment and undermining dry bulk demand
- Excessive new ship ordering if the price gap between newbuilding and secondhand ships closes
- Periods of low fuel prices supporting faster ship operating speeds which increases supply and emissions
Appendix:
We Will Not Order More Newbuildings Today

- Market does not need more newbuildings
  - Extra capacity remains in the global fleet through potentially higher operating speed
  - Limited efficiency benefits from newbuildings compared to good quality Japanese-built secondhand ships
- The industry needs a more reasonable level of profitability
- Risk and payback time for newbuildings is currently excessive due to several uncertainties
  - How best to comply with the global sulphur emissions cap from 2020
  - Which ballast water treatment system to install
  - Questions about the future price, types and availability of fuel
  - Potential additional new regulations (e.g. NO\textsubscript{x} and CO\textsubscript{2} emissions, etc)
  - Faster and potentially more significant technological developments in the longer term
- Attractive secondhand prices compared to newbuilding prices
- New accounting rules requiring time charters to be capitalised from 2019

Discouraging new ship ordering
Appendix: China Major and Minor Bulk Trade

**China Coal Trade**

- Import
- Export
- Net Import

**2018 Chinese Minor Bulk Imports**

- Increased 5% YOY

Chinese imports of 6 minor bulks including Logs, Soyabean, Cereals, Fertiliser, Copper Concentrates & Manganese Ore (Excluding bauxite and nickel ore for which data is not yet available)

**China Iron Ore Sourcing for Steel Production**

- Total requirement for steel production (based on international Fe content level 62.5%)

**China Steel Export**

- Source: Bloomberg, Clarkson Research

2018 Interim Results
Appendix: Sustainability

- Applying sustainable thinking in our decisions and the way we run our business
- Creating long-term value through good corporate governance and CSR

Corporate Social Responsibility (CSR)
- Guided by strategic objectives on (i) workplace practices (primarily safety), (ii) the environment, and (iii) our communities (where our ships trade and our people live and work)
- Active approach to CSR, with KPIs to measure effectiveness
- Reporting follows SEHK’s ESG Reporting Guide
- Disclosure also through CDP, HKQAA, CFR for HK-listed companies

Corporate Governance & Risk Management
- Adopted recommended best practices under SEHK’s CG Code (with quarterly trading update)
- Closely integrated Group strategy and risk management
- Transparency priority
- Stakeholder engagement includes in-depth customer and investor surveys
- Risk management committee interaction with management and business units
- Integrated Reporting following International <IR> Framework of IIRC
