Overview and Business Model

Pacific Basin

Pacific Basin Overview

- World's largest owner and operator of modern Handysize & Supramax ships
- Cargo system business model – consistently outperforming market rates
- Own 108* Handysize and Supramax vessel, with total 220+ dry bulk ships on the water serving major industrial customers around the world
- Hong Kong headquartered and HKEx listed, 12 offices worldwide, 335 shore-based staff, 3,400+ seafarers#
- Strong balance sheet with US$2bn+ total assets and US$300mn+ cash
- Our vision: To be a shipping industry leader and the partner of choice for customers, staff, shareholders and other stakeholders

* An additional 3 vessels we purchased will deliver in 2H18 and early 2019
# As at Jul 2018

Understanding Our Core Market

The Dry Bulk Sector

Other Mainstream Shipping Sectors

Bulk Carriers for dry bulk commodities

Tankers for oil, gas & chemicals

Containerships for containerised goods

Our Focus

	Bulk Carrier Ship Types	Percentage of Global Dry Bulk Capacity	Versatility
Minor Bulks with cranes	**Handysize** 25,000–41,999 dwt	10%	More Versatile
Minor Bulks with cranes	**Supramax** (formerly Handymax) 42,000–64,999 dwt	24%	More Versatile
Major Bulks without cranes	**Panamax & Post-Panamax** 65,000–119,999 dwt	27%	Less Versatile
Major Bulks without cranes	**Capesize** 120,000+ dwt	39%	Less Versatile

Main Commodities Carried

Minor Bulks

- Ores & Concentrates
- Alumina
- Bauxite
- Coal/Coke
- Petcoke
- Salt
- Sand & Gypsum
- Grains
- Fertiliser
- Sugar
- Logs/Forest Goods
- Cement & Clinker
- Steel
- Scrap

Major Bulks

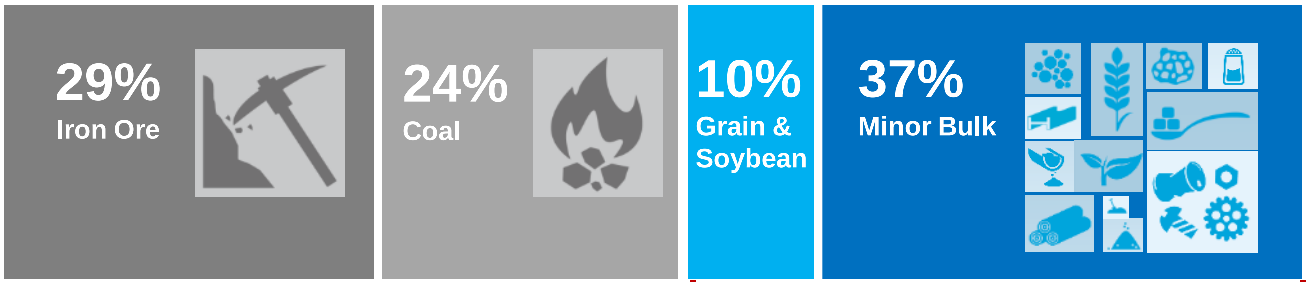
- Grains
- Coal
- Iron Ore

Few ports, few customers, few cargo types, low scope for triangulation

Many ports, many customers, many cargo types, high scope for triangulation

Why Handysize and Supramax?
Why Minor Bulk?

Full Year 2017 Global Dry Bulk Trade (Volume) = 5.1 Billion Tonnes (+4% YOY)



- ✓ Minor Bulks & Grain is 47% of total Dry Bulk demand
- ✓ Pacific Basin focuses on these growing markets

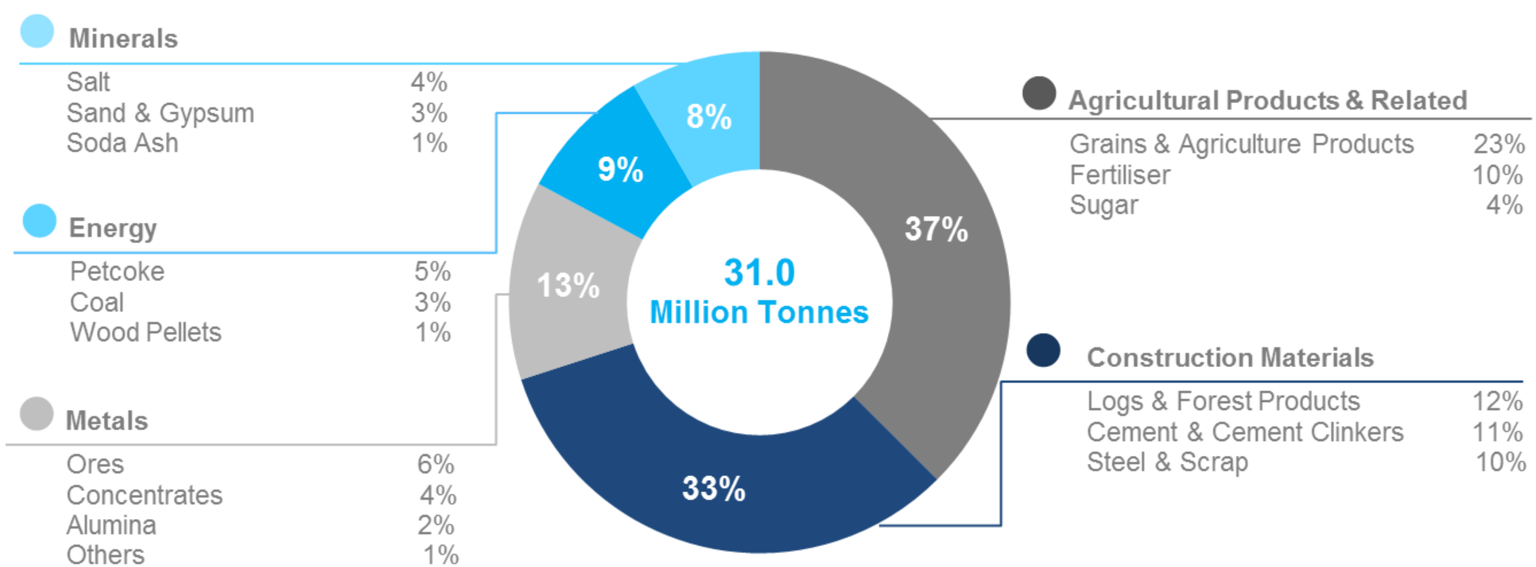
- More diverse customer, cargo and geographical exposure enables high utilisation
- A segment where scale and operational expertise make a difference
- Better daily TCE earnings driven by a high laden-to-ballast ratio
- Sound long-term demand expectations and more modest fleet growth

Source: Clarksons Research, 1 Feb 2018

Pacific Basin

Pacific Basin Dry Bulk – Diversified Cargo

Our Dry Bulk Cargo Volumes in 1H 2018



- Diverse range of commodities reduces product risk
- China and North America were our largest markets
- About 60% of business in Pacific and 40% in Atlantic

Our Business Model Continues to Outperform

Our business model has been refined over many years. We are able to generate a TCE earnings premium over market rates because of our high laden percentage (minimum ballast legs), which is made possible by a combination of:

- Our fleet scale
- High-quality interchangable ships
- Experienced staff
- Global office network
- Our cargo contracts, relationships and direct interaction with end users
- Our fleet has a high proportion of owned vessels facilitating greater control and minimising trading constraints
- Our segment's versatile ships and diverse trades

Our TCE Outperformance Compared to Market in Last 5 Years

US$1,850

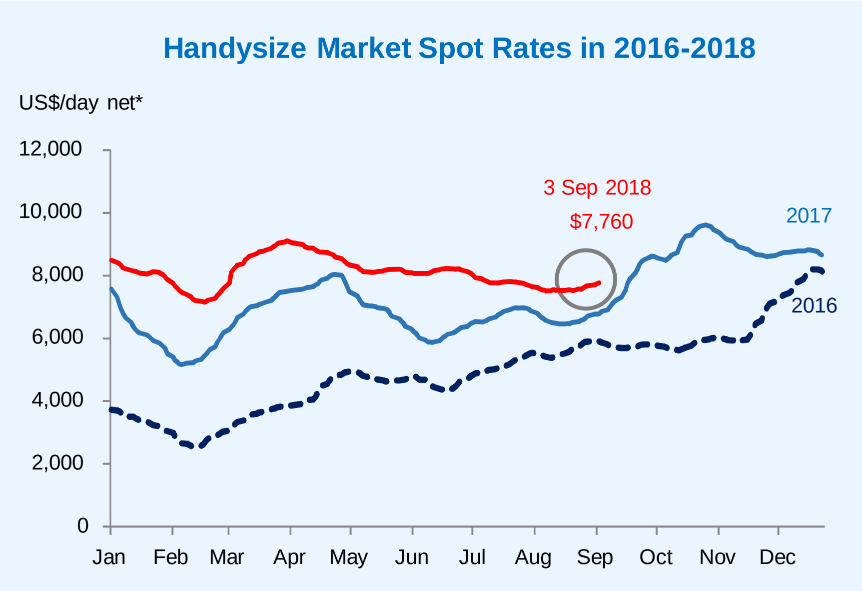
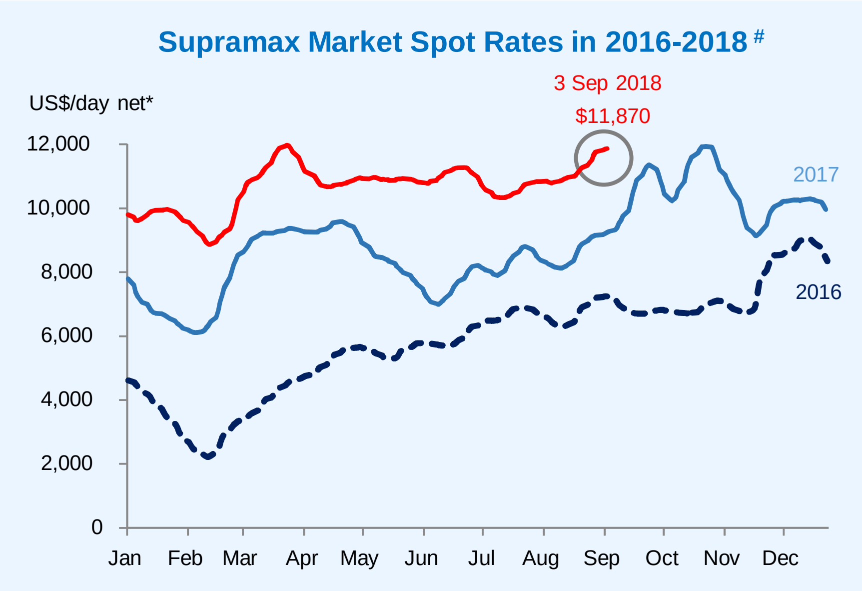
Baltic Indices PB Premium

Market Review

Freight Market Continues to Improve





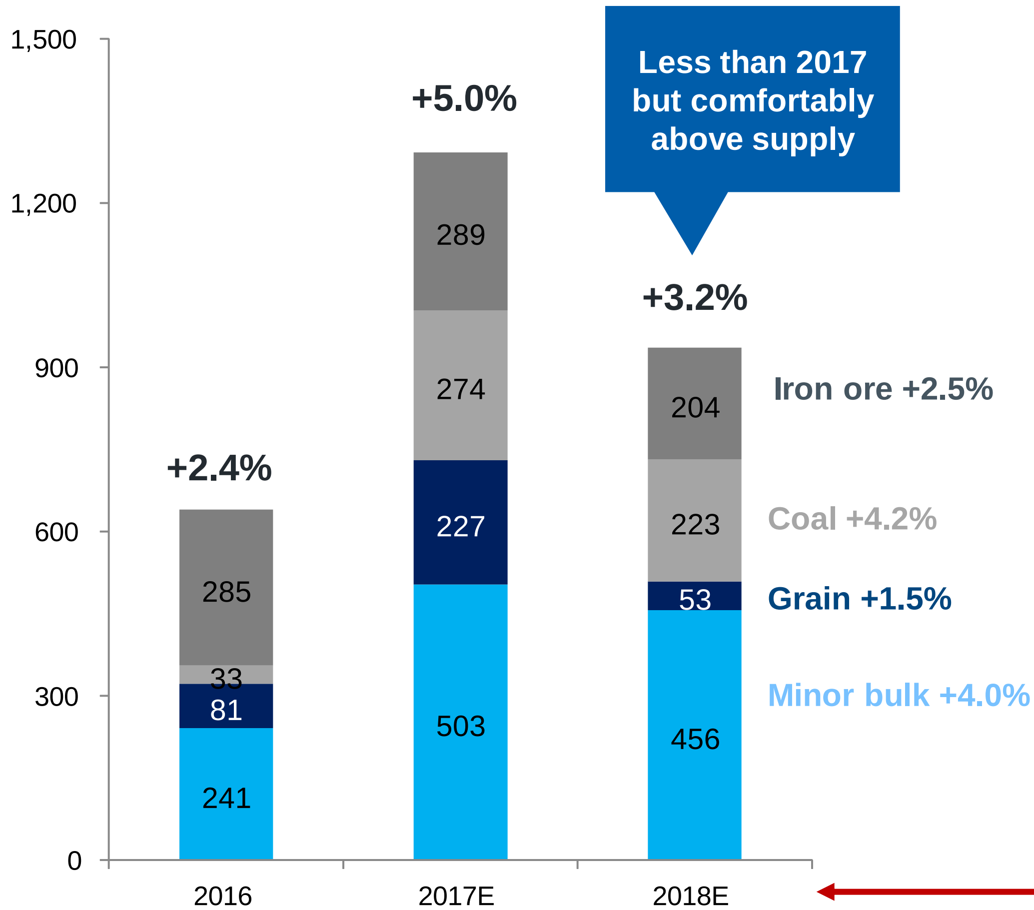
- YTD 2018 freight indices have followed a similar seasonal pattern as last year at improved levels
- Broad based economic growth driver of dry bulk demand
- Key positive drivers through the 1H included improved Brazilian and US grain exports. US coal exports also grew strongly to a five-year high
- Pacific demand benefited from increased trade in bauxite, nickel ore, copper concentrate, forestry products and other minor bulks in which we specialise. In 1H18, Chinese electricity generation grew 9% yoy, and Chinese steel exports declined 14% due to strong domestic demand

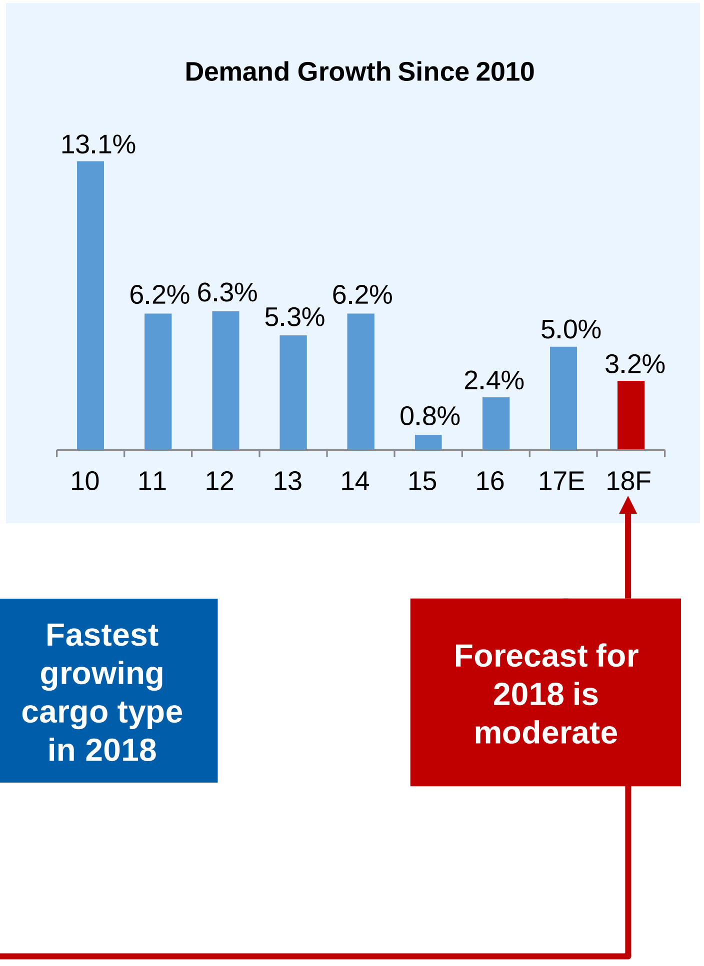
** excludes 5% commission*

 # BSI is now based on a standard 58,000 dwt bulk carrier

Source: Baltic Exchange, data as at 3 Sep 2018

2018 Demand is Forecast to Grow 3.2% with Minor Bulks at +4.0%

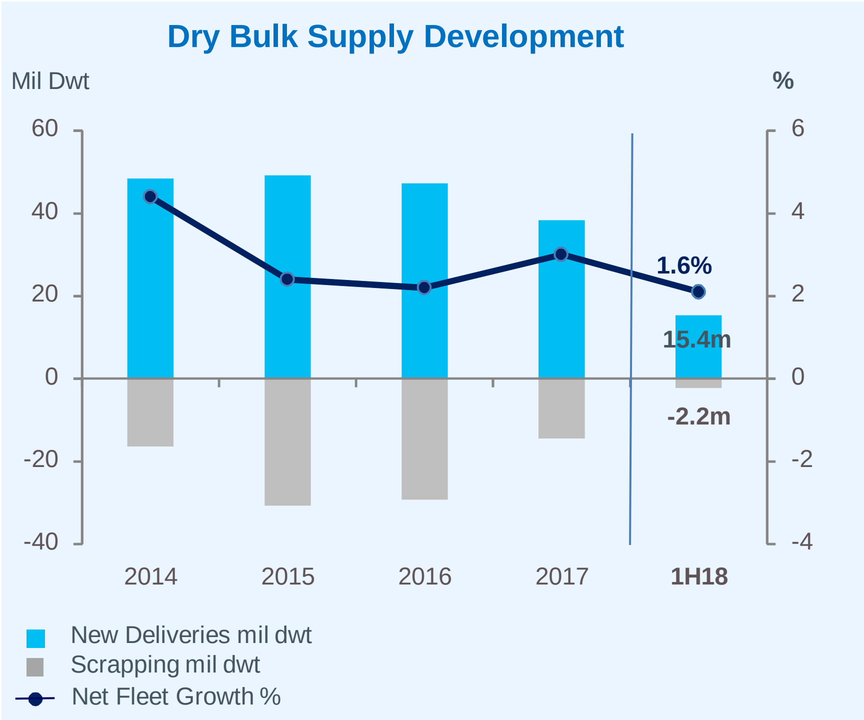


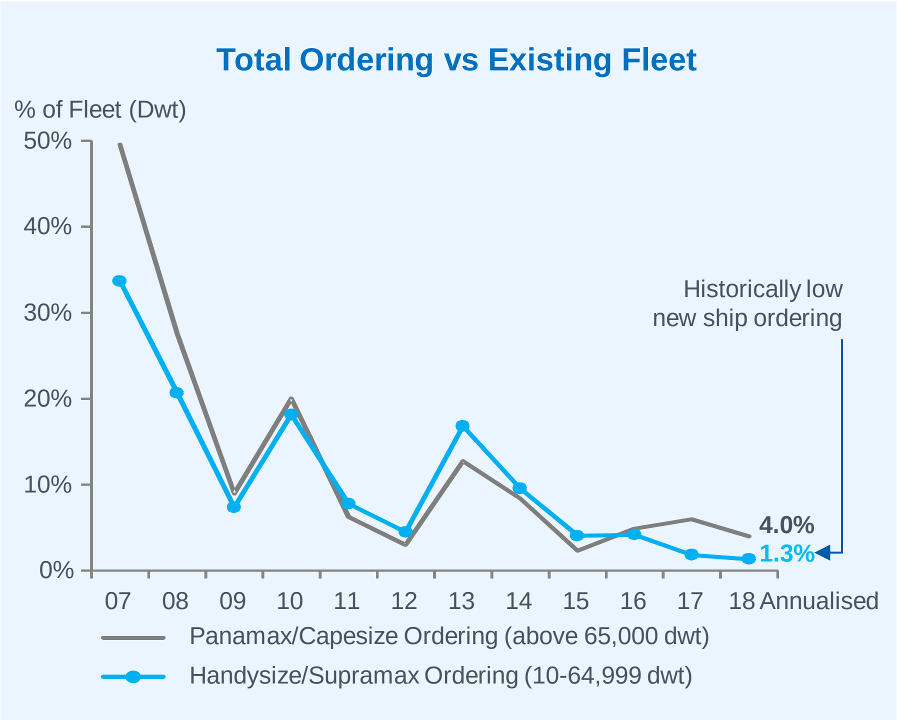


Source: Clarkson Research, 1 Aug 2018

Pacific Basin

Newbuilding Deliveries Continue to Reduce





- 1.6% net fleet growth in 1H18 (1.9% deliveries less 0.3% scrapping)
- Very limited ordering in Handysize and Supramax (historically low 1.3% of fleet)
  + continued orderbook delivery shortfall
  ➔ should result in continued low new ship deliveries in coming years

Source: Clarksons Research, as at 1 Jul 2018

Better Fundamentals for Handysize

	Orderbook as % of Existing Fleet	Average Age	Over 20 Years	Over 15 Years	YTD Scrapping as % of Existing Fleet as at 1 Jul 2018 (annualised)
Handysize – 82m dwt (25,000-41,999 dwt)	**5.3%**	**9**	**10%**	**17%**	**0.4%**
Supramax – 196m dwt (42,000-64,999 dwt)	**5.6%**	**9**	**7%**	**15%**	**0.3%**
Panamax – 221m dwt (65,000-119,999 dwt)	**8.3%**	**9**	**6%**	**16%**	**0.1%**
Capesize and larger – 315m dwt (120,000+ dwt)	**14.7%**	**8**	**6%**	**12%**	**0.9%**
Total Dry Bulk – 830m dwt (>10,000 dwt)	**9.7%**	**9**	**7%**	**15%**	**0.5%**

Pacific Basin

New Regulations

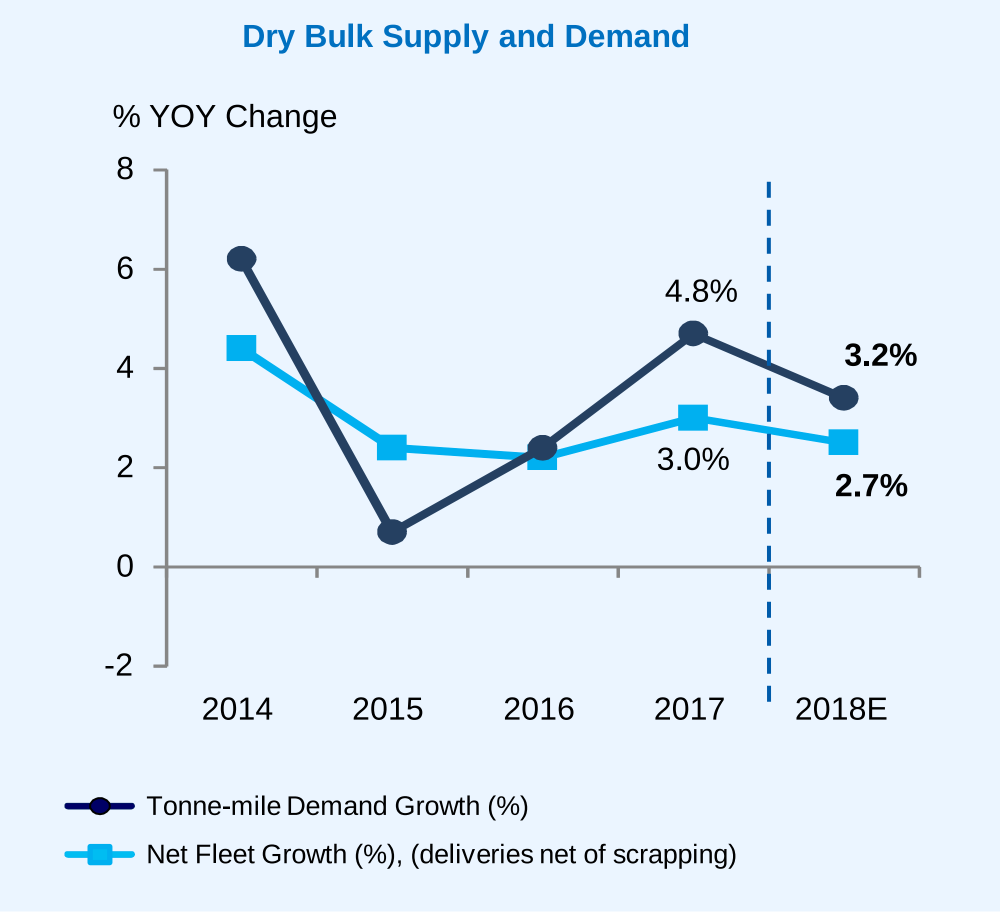
New Regulations	Content	Impact on the Industry	PB actions
IMO Ballast Water Treatment: Installation required at first dry-docking after 8 Sep 2019	▪ International Maritime Organization (IMO) requires ballast water treatment equipment (BWTS) to be fitted on all ships ▪ US Coast Guard requires all ships sailing to US to use approved BWTS	▪ Increased capex for existing shipowners ▪ Increased potential scrapping	▪ 9 owned vessels are fitted with BWTS ▪ Committed to retrofit 50 owned vessels with a system based on filtration and electrocatalysis ▪ Negotiating BWTS systems for remaining 50+ owned vessels ▪ Well positioned to complete implementation by 2023

Low Sulphur Emissions Cap: 1 Jan 2020
Larger impact on the industry
	▪ IMO has set a global 0.5% sulphur limit for marine fuel oil, effective 2020 (in addition to existing 0.1% sulphur limit in Emission Control Areas)
	Exception: Shipowners can use higher sulphur fuel if they fit scrubbers (costing several million US$) to clean exhaust gas
		▪ Low sulphur fuel is more expensive
		  ▪ Increased demand for low sulphur fuel
		  ▪ Decreased demand for heavy fuel oil
		  ▪ More slow-steaming contribute to better supply-demand balance
		▪ Increased capex (if installing scrubbers)
		▪ Uncertainty of ship design should hold back newbuild ordering
		▪ Increased potential scrapping
		Low uptake of scrubbers expected by 2020
			▪ We lobbied for a mandate for all ships to burn low sulphur fuel since this would support a level playing field, lower speeds and lower emissions (incl CO2)
			▪ However, it appears there is now no scope to change the rules, and some owners of larger vessels (incl. some Supramax owners) are planning to install scrubbers
			▪ We are assessing both the low sulphur fuel and scrubber options, but continue to believe the majority of the dry bulk fleet (especially smaller ships like Handysize) will comply by using low sulphur fuel

Reducing carbon and greenhouse gas emission by 2050 Larger impact on the industry	▪ IMO announced to cut total carbon and greenhouse gas emissions from shipping by at least 50% by 2050 (compared to 2008), requiring average efficiency improvements of at least 40% by 2030 and 70% by 2050	▪ Reducing speed of vessels to reduce emission contribute to better supply-demand balance ▪ Development of new fuels, engine technology and vessel designs ▪ Increased potential scrapping	▪ Holding back ordering of new ships and closely monitoring the development of new technology and designs

We believe the new regulations will penalise poor performers and older ships while benefitting stronger companies with high quality ships that are better positioned to adapt and cope practically and financially with compliance

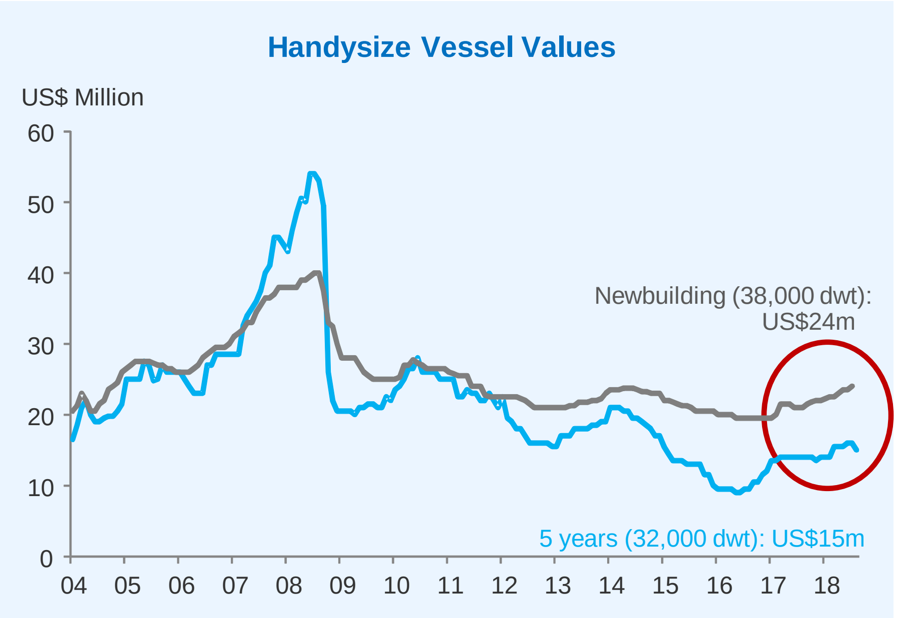
Favourable Dry Bulk Supply and Demand Outlook

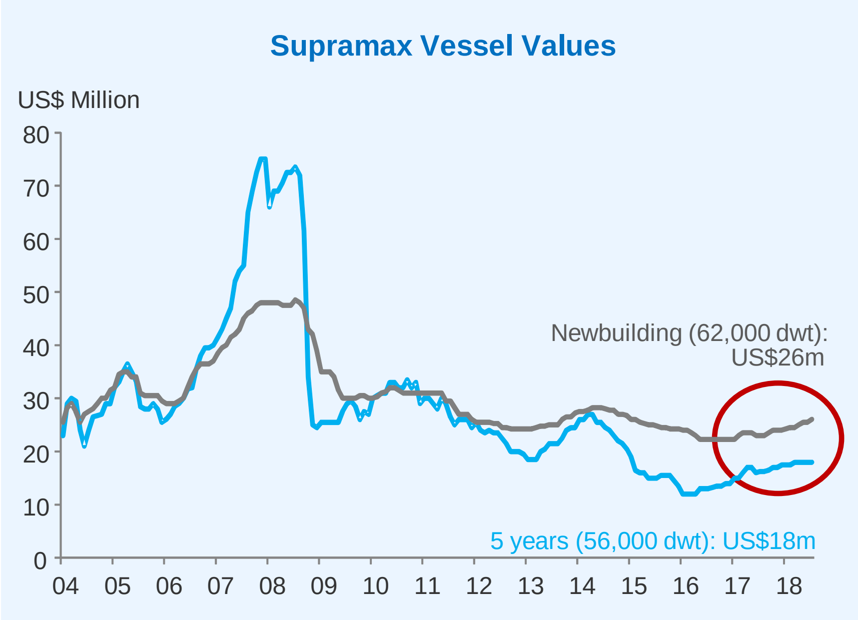


- Clarksons Research estimate dry bulk shipping tonne-mile demand improved 1% yoy in 1Q18 (2.1% on an overall demand basis)
- 2Q18 expected to show further improvement, and even stronger improvement in minor bulk segment
- Clarksons Research estimate in FY18:
  - 3.2% tonne-mile demand growth
  - 2.7% net fleet growth (3.3% deliveries – 0.6% scrapping)
- Actual deliveries expected to be around 27m dwt compared to 38m dwt in 2017
- Progressively fewer new ships will deliver from shipyards in 2018 and 2019

Source: Clarksons Research, as at 1 Aug 2018

Improved Outlook Supports Vessel Values





- Improved freight market conditions supported sale and purchase activity and increased vessel values
- However, gap between newbuilding and secondhand prices continues to discourage new ship ordering
- We see upside in secondhand values

Source: Clarksons Research, as at 31 Aug 2018

Financial and Operating Review

Pacific Basin

2018 Interim Results - Highlights

US$m	1H18	1H17	Change
EBITDA	**99.3**	56.6	+42.7
Underlying profit / (loss)	**28.0**	(6.7)	+34.7
Net profit	**30.8**	(12.0)	
Dividends	**HK2.5¢**	-	
US$m	**30 June 18**	31 Dec 17	
Cash	**317.1**	244.7	
Net gearing	**36%**	35%	
Owned fleet / Total fleet *	**108 / 224**	106 / 222	

- Better minor bulk market rates combined with our continued outperformance and competitive cost structure supported much improved results
- We have declared an interim dividend of HK2.5¢/share
- We secured a US$325m revolving credit facility that significantly extends our repayment profile and lowers our finance costs
- We acquired 5 modern vessels including 4 funded 50% by equity, which will grow our owned fleet to 111 ships
- Trade dispute actions to date impact only a small fraction of trades in which we are engaged, but an escalating global trade war could impact global GDP and dry bulk demand
- We remain cautiously optimistic for a continued market recovery, with some volatility along the way

* *An additional 3 vessels we purchased will deliver in 2H18 and early 2019*

* Based on current fleet and commitments, and all other things being unchanged

Our Outlook and Strategy

Outlook

- Minor bulk freight market strengthened again in the 1H18, the favourable outlook for widely-spread global GDP growth bodes well for dry bulk demand, and supply fundamentals are now more positive
- Possible market drivers in the medium term:
  - + Positive economic growth and commodity demand outlook, low deliveries, and new regulations discouraging new ship ordering
  - − Risk of reduced Chinese coal and ore imports, trade tariffs and trade conflict escalation impacting dry bulk demand; increased new ship ordering and faster ship operating speeds
- We are cautiously optimistic for a continued market recovery, although with some volatility along the way

Strategy – Well Positioned for a Recovering Market

- Continue to focus on our world-leading Handysize and Supramax business
- Maximise our fleet utilisation and TCE earnings by combining minor bulk characteristics with our large fleet of substitutable ships and global office network
- Continue to look at good quality secondhand ship acquisition opportunities
- No newbuildings in the medium term, we will watch technological and regulatory developments closely
- Healthy cash and net gearing positions enhance our corporate profile as a preferred, strong, reliable, safe partner for customers and other stakeholders

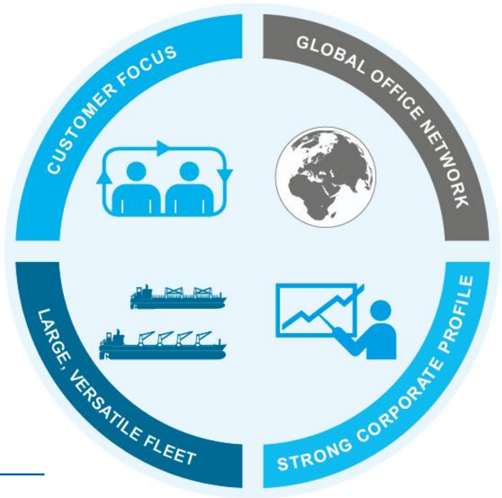
MARKET-LEADING CUSTOMER FOCUS & SERVICE

Priority to build and sustain long-term customer relationships

Solution-driven approach ensures accessibility, responsiveness and flexibility towards customers

Close partnership with customers generates enhanced access to spot cargoes and long-term cargo contract opportunities of mutual benefit



COMPREHENSIVE GLOBAL OFFICE NETWORK

Integrated international service enhanced by experienced commercial and technical staff around the world

Being local facilitates clear understanding of and response to customers' needs and first-rate personalised service

Being global facilitates comprehensive market intelligence and cargo opportunities, and optimal trading and positioning of our fleet

LARGE FLEET & MODERN VERSATILE SHIPS

Fleet scale and interchangeable high-quality ships facilitate service flexibility for customers, optimised scheduling and maximised vessel and fleet utilisation

In-house technical operations facilitate enhanced health & safety, quality and cost control, and enhanced service reliability and seamless integrated service and support for customers

STRONG CORPORATE & FINANCIAL PROFILE

Striving for best-in-class internal and external reporting, transparency and corporate stewardship

Strong cash position and track record set us apart as a preferred counterparty

Hong Kong listing, scale and balance sheet facilitate good access to capital

Responsible observance of stakeholder interests and our commitment to good corporate governance and CSR

Key Drivers in 1H18

- Broad based economic recovery seen through increased steel output, also outside China
- US coal exports grew strongly
- Stronger minor bulk demand in Atlantic driven by Brazilian and US agricultural exports; Pacific demand benefited from increased trade in bauxite, nickel ore, copper concentrates and forestry products and other minor bulks in which we specialise

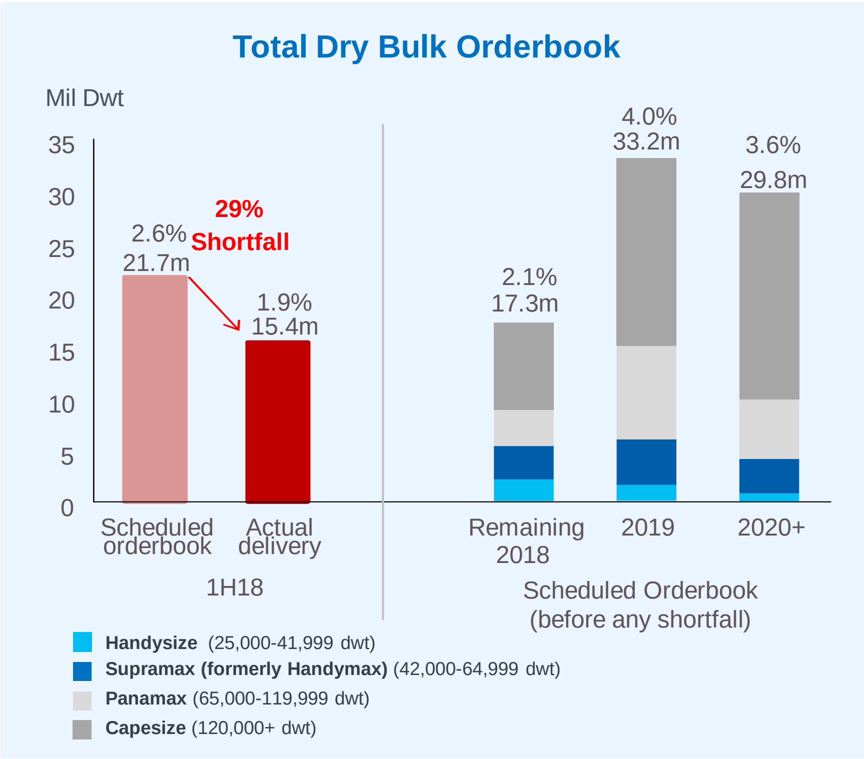
Longer-Term Trends beyond 2018

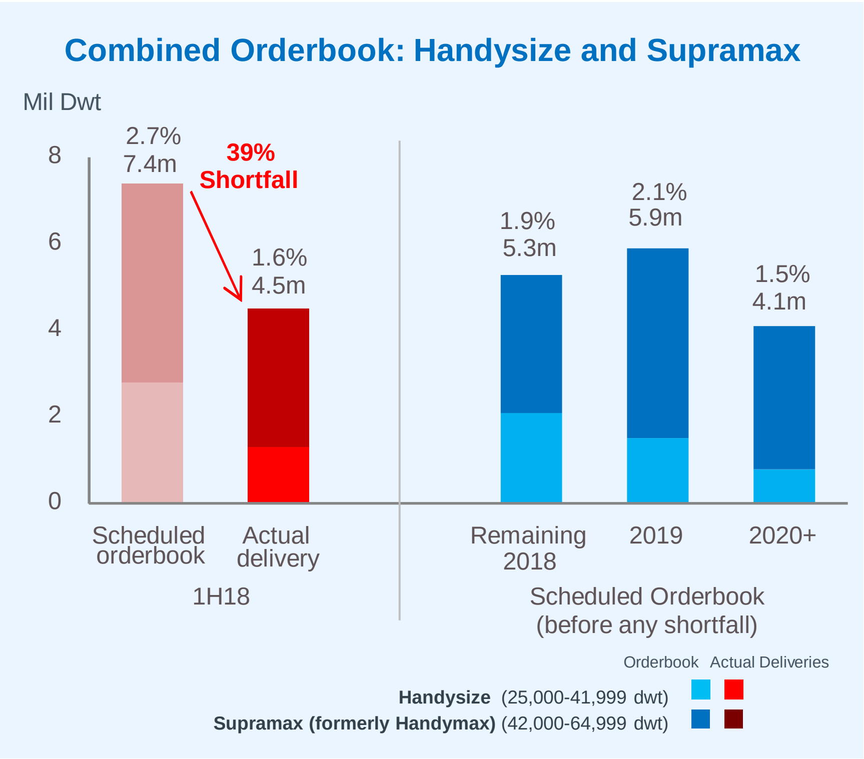
- Solid world GDP (+3.9%*) – main driver for dry bulk demand growth
- Continued growth in grain demand for animal feed due to shift towards meat-based diet
- Trade disputes between US and its key trading partners appear so far to have had only limited impact on agricultural and steel trade volumes globally, but an escalating global trade war could impact global GDP and dry bulk demand
- Government policy in China and India could affect coal trades - up or down

2018 tonne-mile effect

- Longer average distances are forecast to supplement volume growth by an additional 0.6%, generating total demand growth of 3.2% (+4% for minor bulk)

Appendix: Handysize and Supramax Scheduled Orderbook at Historically Low Level





- Combined Handysize and Supramax scheduled orderbook has reduced to 5.5%, lowest since 1990s

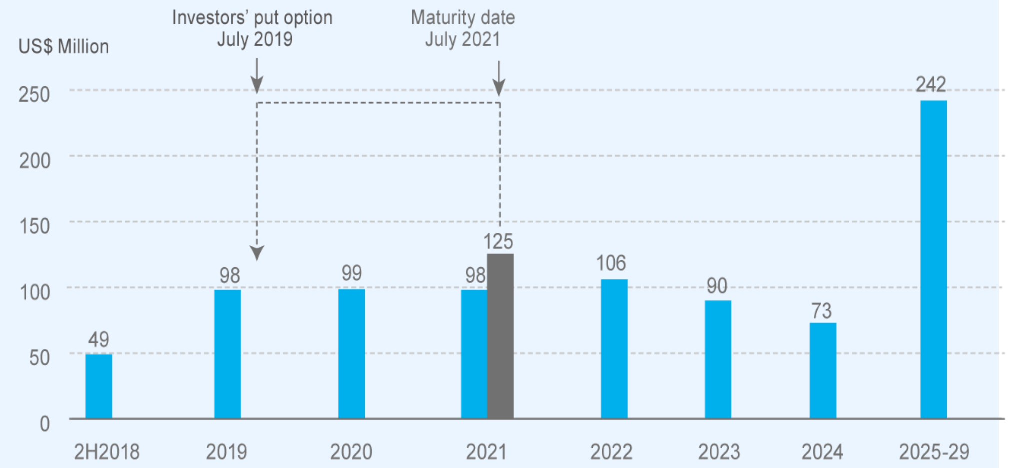
Schedule of Repayments of Borrowings



Cash and deposit balance | Cash inflow | Cash outflow | Secured borrowings (US$855m) | Convertible bond (face value US$125m), book value US$119m, maturity July 2021

- In June, we closed a new US$325m syndicated 7-year reducing revolving credit facility secured against 50 ships (including 9 un-mortgaged vessels) at Libor +1.5%. The facility refinanced 6 existing committed loan facilities and raised an additional US$136m in available funding. Upon closing, the facility was fully drawn.

US$317m Cash & Deposits	**6 vessels[1]** Unmortgaged (approx. US$120m market value)	**US$50m Capex[2]** 3 secondhand Vessels in 2H18 & 2019	KPI **3.8%** Average Cash Interest Rate

[1] Including 3 vessels to be delivered in 2H18 and early 2019
[2] US$50m Capex = US$13.5m in cash + US$36.5m in shares

Appendix: Dry Bulk Outlook in the Medium Term

Possible market drivers in the medium term

Opportunities

- Strong industrial growth and infrastructure investment in China and beyond enhancing demand for dry bulk shipping
- Positive and widely spread growth outlook for all major economic areas
- Continued strong grain demand primarily for animal feed due to shift towards meat-based diet
- Environmental policy in China encouraging shift from domestic to imported supply of resources
- Environmental maritime regulations encouraging ship scrapping from current minimal levels and discouraging new ship ordering
- Low newbuilding deliveries in the medium term
- Periods of higher fuel oil prices encouraging slower ship operating speeds which decreases supply and emissions
- Expanding thermal coal imports into emerging south and south-east Asian countries

Threats

- Reduction in Chinese industrial growth and investments impacting demand for dry bulk shipping
- Environmental policy in China encouraging greater shift to renewable energy, possibly impacting coal imports
- Trade tariffs between US and its major trading partners resulting in short-term reduction in trade volumes while importers seek alternate commodity sources
- Escalating trade disputes impacting global GDP growth, weakening sentiment and undermining dry bulk demand
- Excessive new ship ordering if the price gap between newbuilding and secondhand ships closes
- Periods of low fuel prices supporting faster ship operating speeds which increases supply and emissions

Pacific Basin

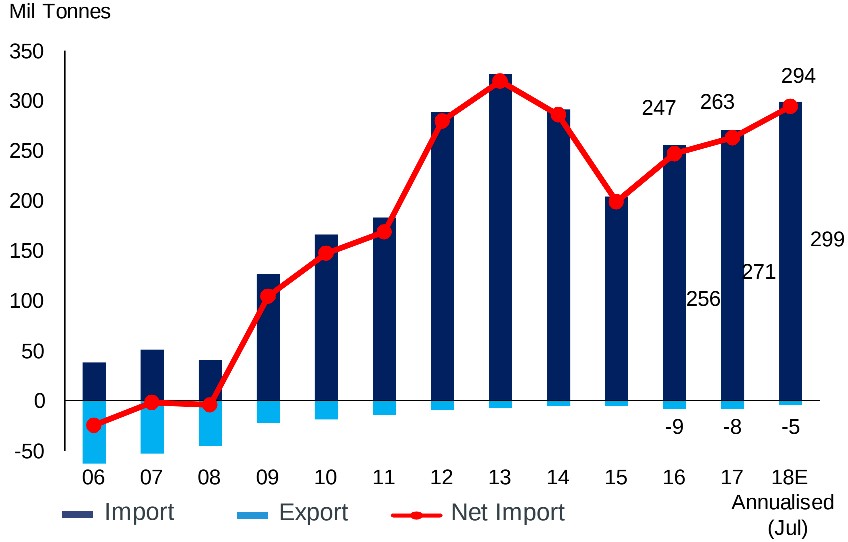
Appendix: We Will Not Order More Newbuildings Today

- Market does not need more newbuildings
  - Extra capacity remains in the global fleet through potentially higher operating speed
  - Limited efficiency benefits from newbuildings compared to good quality Japanese-built secondhand ships
- The industry needs a more reasonable level of profitability
- Risk and payback time for newbuildings is currently excessive due to several uncertainties
  - How best to comply with the global sulphur emissions cap from 2020
  - Which ballast water treatment system to install
  - Questions about the future price, types and availability of fuel
  - Potential additional new regulations (e.g. NO_x and CO_2 emissions, etc)
  - Faster and potentially more significant technological developments in the longer term
- Attractive secondhand prices compared to newbuilding prices
- New accounting rules requiring time charters to be capitalised from 2019

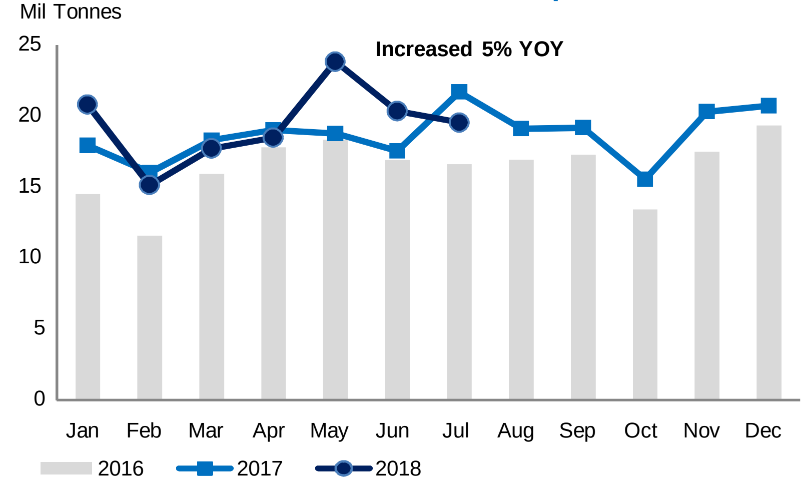
Discouraging new ship ordering

Appendix:
China Major and Minor Bulk Trade

China Coal Trade

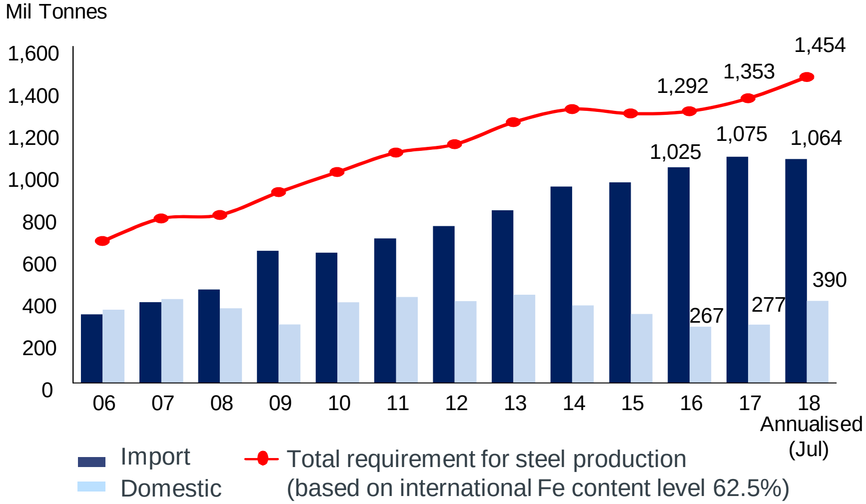


2018 Chinese Minor Bulk Imports



Chinese imports of 6 minor bulks including Logs, Soyabean, Cereals, Fertiliser, Copper Concentrates & Manganese Ore (Excluding bauxite and nickel ore for which data is not yet available)

China Iron Ore Sourcing for Steel Production



China Steel Export

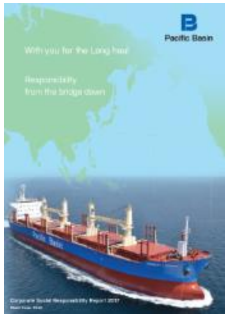
Appendix: Sustainability

- **Applying sustainable thinking in our decisions and the way we run our business**
- **Creating long-term value through good corporate governance and CSR**



2017 CSR Report
www.pacificbasin.com/ar2017

Corporate Social Responsibility (CSR)

- Guided by strategic objectives on (i) workplace practices (primarily safety), (ii) the environment, and (iii) our communities (where our ships trade and our people live and work)
- Active approach to CSR, with KPIs to measure effectiveness
- Reporting follows SEHK's ESG Reporting Guide
- Disclosure also through CDP, HKQAA, CFR for HK-listed companies

Corporate Governance & Risk Management

- Adopted recommended best practices under SEHK's CG Code (with quarterly trading update)
- Closely integrated Group strategy and risk management
- Transparency priority
- Stakeholder engagement includes in-depth customer and investor surveys
- Risk management committee interaction with management and business units
- Integrated Reporting following International <IR> Framework of IIRC

Appendix: Convertible Bonds Due 2021

Issue size	US$125 million
Maturity Date	3 July 2021 (approx. 6 years)
Investor Put Date and Price	3 July 2019 (approx. 4 years) at par
Coupon	3.25% p.a. payable semi-annually in arrears on 3 January and 3 July
Redemption Price	100%
Initial Conversion Price	HK$4.08 (current conversion price: HK$3.03 with effect from 9 Aug 2018)
Intended Use of Proceeds	To maintain the Group's balance sheet strength and liquidity and to continue to proactively manage its upcoming liabilities, including its Existing Convertible Bonds, as well as for general working capital purposes

Conversion/redemption Timeline
