Pacific Basin Overview

- A world leading dry bulk owner/operator of handysize & handymax vessels
- Highly flexible Pacific Basin Dry Bulk business model
  - Large fleet of uniform, interchangeable, modern vessels
  - Mix of owned, long-term and short-term chartered ships
  - Diversified customer base of mainly industrial end users
  - Global trading pattern supported by extensive network of regional officers
- Also owning/operating of off-shore and harbour tugs and RoRo freight ferries
- >220 vessels serving major industrial customers around the world
- Hong Kong headquarters, 22 offices worldwide, 380 Group staff, 2,000 seafarers*
- Our vision: we aspire to be a shipping industry leader and the partner of choice for customers, staff, shareholders, and other stakeholders

* As at July 2011
2011 Third Quarter Highlights

PB Dry Bulk

- Handysize and Handymax freight rates have increased 12% and 22% respectively since 30 June marking an earlier, stronger than anticipated improvement.
- BDI increased 52% since mid-year driven by a 147% increase in Capesize rates mainly attributable to:
  - A return to activity following the traditionally quieter summer
  - Healthy commodity demand in Asia – Chinese demand for minor bulks in particular
- We anticipate sustained dry bulk, high scrapping levels and reduced newbuilding deliveries will support a continued relatively healthy supply/demand balance for minor bulk segments in 2012 overall, though this balance could weaken if global economic growth slows further.
- We have secured forward cargo cover as follows:

<table>
<thead>
<tr>
<th></th>
<th>Year 2011</th>
<th>Year 2012</th>
</tr>
</thead>
<tbody>
<tr>
<td>Handysize</td>
<td>91% (US$13,450)</td>
<td>32% (US$13,540)</td>
</tr>
<tr>
<td>Handymax</td>
<td>102% (US$15,320)</td>
<td>70% (US$14,110)</td>
</tr>
</tbody>
</table>

PB Energy & Infrastructure Services

- Significant improvement is expected to continue with growth in new Australian offshore oil and gas projects.

PB RoRo

- Nafta Gulf Bridge service has been suspended due to unsatisfactory demand, but our 2 ships previously employed in that trade have been redeployed.
- Expect the charter market for RoRo vessels to remain depressed into 2012.
We believe banking industry pressures may significantly dampen many ship owners’ ability to fund second hand ship acquisitions.

Source: The Baltic Exchange, Clarksons
Minor bulk and other key commodities increased in first 8 months lending some buoyancy to Handysize / Handymax rates

- Expanded import of some metal ores such as manganese and nickel ore as much as 60% YOY
- Seaborne log imports continuing to underpin demand for Handysize log carriers in the Pacific

Source: Bloomberg, Clarksons
Note: Clarksons estimates China will import 38.1m tonnes in 2011
2011 full year annualised figure is based on actual Jan to Aug figures
Dry Bulk Demand

- Growth in Chinese import of raw materials, including coal and minor bulks such as logs & grains
- Increased Chinese domestic coastal transportation in bulk carriers, especially coal
- Widening East-West imbalance attracting more ballast vessels from Asia to distant load ports for return cargoes

Source: RS Platou
Dry Bulk Fleet Changes

- Dry bulk capacity expanded 14% YOY net
- Handysize expanded only 1% net in the third quarter
- 35% of handysize fleet is over 25 years old
- High scrap price supports healthy scrapping

**Handysize Age Profile** (25,000-39,999 dwt)
2,035 vessels (64.8m dwt)

- 30+ years: 9%
- 25-29 years: 26%
- 0-15 years: 56%
- 16-24 years: 9%

**Dry Bulk Scrapping versus BDI**

**Dry Bulk Fleet Deliveries 2011**

- 31% delivery shortfall for dry bulk fleet,
- 45% shortfall for handysize

Source: Clarksons, as at 1 Oct 2011, Morgan Stanley, Bloomberg
*Scheduled orderbook as at 1 Jan 2011*
Dry Bulk Orderbook

- 137m dwt* new dry bulk capacity scheduled to deliver in FY 2011
- Ship owners ordered 66% less newbuilding capacity YOY due to weak market conditions
- We expect approx. 30% slippage in FY 2011
- Less onerous handysize orderbook

- 12,310 days
- US$15,320
  - 102%
- 3,000 days
- US$14,110
  - 70%

Note: NB – newbuilding
Pacific Basin Dry Bulk - Outlook

+ China’s continued dependence on imported minor bulks
  - Slow steaming because of high fuel prices and weak market
  - Scrapping increase
  - Revival of Japan industrial production

- Continued excessive newbuilding deliveries
  - Faltering global economic recovery and stimulus withdrawal
  - Less imports due to China tightening policy
  - High commodity price favour more Chinese domestic production
  - Mining capacity shortfall and commodity supply bottlenecks

PB Conclusion:
- Softening Chinese demand expected to be balanced by US grain exports in the fourth quarter
PB Energy & Infrastructure Services

3Q11 Performance

- The market for both offshore and harbour towage services continued its significant improvement in the 3Q.
- Further improved rates and trading conditions for PB Towage’s Australasia-focused business.

Offshore and infrastructure support

- Continued to position PB Towage as a leading sub-contractor to Australasian offshore construction markets.
- Queensland Curtis Island LNG project began in February.
- Gorgon Project contract extended till 2014.

Harbour Towage

- Increased our market share in Australian ports.
- Improved performance partially offset by flood-affected Townsville activity.

Annualised return on net assets:

-1%  4%

Towage Fleet: 43 vessels (as at 24 October 2011)

- 35 Tugs (33 Owned+2 Chartered)
- 7 Barges (6 Owned + 1 Chartered)
- 1 owned Bunker Tanker
PB Energy & Infrastructure Outlook

- High oil prices buoying demand for new, cleaner, safer fuel sources
- Australia striving to become a major LNG exporter
- Continued commodity supply recovery in Queensland
- Faltering global economic recovery
- Australian commodity exports and port activity affected by tightening policy in China
- High commodity prices
- Increasing market competition & political instability in Middle East

PB Conclusion:
- Significant improvement is expected to continue with growth in new Australian offshore oil and gas projects
3Q11 Performance:

- 4 out of 5 delivered vessels are employed, our final newbuilding is scheduled to deliver in Nov 2011
- Nafta Gulf Bridge service has been suspended due to unsatisfactory demand, but our 2 ships previously employed in that trade have been redeployed in the US Gulf at low rates
- Engaging in developing employment for our final 2 newbuildings

</tr>
<tr>
<td>1H Daily cost: US$22,080</td>
<td></td>
</tr>
</tbody>
</table>

Source: Navitaship, data as at July 2011
**PB RoRo Outlook**

- Slow growth in European exports and intra-European trade overall
  - Gradual, slow growth in trailer volumes
  - Scrapping
  - High fuel prices making modern vessels more attractive

- Significant new RoRo deliveries scheduled in rest of year
  - Most European RoRo operators still have excess capacity and are not chartering new vessels
  - Increased austerity in Europe
  - Hesitant global economic recovery
  - Weak support for RoRo services in US Gulf

**PB Conclusion:**

- Expect RoRo charter market to remain depressed into 2012 due to muted growth in freight volumes overall and a potentially weaker European economy threatened by recession
- We expect PB RoRo to be loss-making in 2011 and 2012, based on daily cost US$22,080 in 1H11
- PB RoRo earnings coverage:

<table>
<thead>
<tr>
<th>As at 24 Oct 2011</th>

<td>80%</td>
<td>16%</td>
</tr>
</tbody>
</table>

Note: Charter rates earned in Euros is translated to US$ at an indicative rate of €1.00 to US$1.35
Outlook

- We expect:
  - A sustained dry bulk demand, high scrapping levels and reduced newbuilding deliveries will support a continued relatively healthy supply/demand balance for minor bulk segments in 2012 overall
  - This balance could weaken if global economic growth slows further
  - We see evidence of softening Chinese demand for some commodities which we expect to be balanced by the seasonal resumption of 4Q US Gulf grain exports
  - Charter market for RoRo ships to remain depressed into 2012
  - Banking industry pressures may significantly dampen many ship owners’ ability to fund second hand ship acquisitions and force them to find additional cash resources to meet capital and banking obligations
  - Pressure on ship values to generate further opportunities to acquire modern dry bulk ships at reasonable cost
  - Our strategy remain unchanged: we seek to expand further our dry bulk fleet
Further commitments expected in Dry Bulk

Appendix: Differentiated from BDI & Traditional Ship Owning

Smaller bulk carrier segment benefits from:

- Handysize orderbook smaller than ship capacity over 25 years old
- Diverse range of commodities carried and trade patterns
- Greater access to ports
- Growing minor bulk trade imbalances

**Fleet**
- Modern, large scale & interchangeable ships
- Ability to change market exposure through charter activity
- Higher utilisation and earnings ability through optimum scheduling
- Low breakeven cost and fuel efficient

**Unique network of offices**
- Close to our customers and understand their needs
- Local chartering and operations staff support
- Broad access to cargo and contract opportunities
- New office in Stamford

**Customer focus**
- Strong relationship with over 300 customers
- Mainly industrial commodity producers and end-user
- Mixed with spot & long term contracts of affreightment

**Corporate profile**
- Trusted & transparent counterparty
- Strong public balance sheet and track record
Diverse range of commodities reduces product risk
Australia and China were our largest loading and discharging zones respectively
**Appendix: China at late-Industrialisation Stage**

- China growth matches historical trend in Japan and Korea
- Suggests strong growth in dry bulk segment to remain for medium term
- Similar trend for electricity and cement

The graph shows the steel consumption per capita for China, Japan, Korea, and India, highlighting their respective growth trends from different start years. The data suggests a pattern of growth that aligns with historical trends observed in Japan and Korea.

### Conversion Condition

- Before 11 Jan 2011: No Conversion is allowed
- 12 Jan 2011 – 11 Jan 2014: Share price for 5 consecutive days > 120% conversion price
- 12 Jan 2014 – 5 Apr 2016: Share price > conversion price

### Intended Use of Proceeds

To purchase the 3.3% Existing Convertible Bonds due 2013 then redeem the remaining part of the Existing Convertible Bonds should bondholders’ request on 1 Feb 2011 or maturity in 2013

### Conditions

- Shareholders approval at SGM to approve the issue of the New Convertible Bonds and the specific mandate to issue associated shares.
- If the specific mandate is approved by the shareholders at the SGM, the company would not pursue a new general share issue mandate at the forthcoming AGM on 22 April 2010

### Closing Date

- 12 Apr 2010
- 12 Jan 2011

### Maturity

- 5 Apr 2016
- 12 Apr 2016

### Conversion/redemption Timeline

- PB’s call option to redeem all bonds
  1) Trading price for 30 consecutive days > 130% conversion price in effect
  2) >90% of Bond converted / redeemed / purchased / cancelled

- Bondholders can convert to PB shares when trading price > conversion price
- Bondholder’s put option to redeem bonds

- No Conversion
