Pacific Basin

# Q310 Trading Update

28 Oct 2010

# Pacific Basin Overview

- One of the world's leading dry bulk owner/operators of modern handysize and handymax vessels
- Pacific Basin Dry Bulk's business model is highly flexible
  - Large fleet of uniform, interchangeable, modern vessels
  - Mix of owned, long-term and short-term chartered ships
  - Diversified customer base of mainly industrial end users
  - Providing variety of chartering options, mainly COAs & spot fixtures
- Growing presence in:
  - Energy & Infrastructure Services
  - RoRo Shipping
- 176 vessels serving major industrial customers around the world
- Hong Kong headquarters, 20 offices worldwide, 360+ Group staff, 1,800+ seafarers \*

\* As at 1 Oct 2010

# 2010 Third Quarter Highlights

## *PB Dry Bulk*

- Overall dry bulk market improved sooner than we expected following a mid-year slow-down, although rates for handysize and handymax segments have trended down since Sept.
- Baltic Dry Index has increased 60% since market upturn in July; Q3 average handysize spot rates increased 30% year on year despite slipping since September
- Market for smaller ships were influenced by:
  - Seasonal recovery followed by a subsequent decline in grain export & minor bulks shipments;
  - Rapid new ship deliveries
- Our core fleet has expanded with long term charters of 3 more ships (17 purchased and long term chartered since December 2009)
- We have secured forward cargo cover as follows:

	Year 2010	Year 2011
Handysize	94% (US\$16,670)	37% (US\$14,230)
Handymax	99% (US\$22,470)	109% (US\$16,590)

**We expect to see a seasonal upswing in the market for handysize and handymax bulk carriers in November and into early 2011**

# Dry Bulk Market Information

## Sector Earnings Performance in 2010 versus Average 2009

## Baltic Dry Index

## 5 Year Old 28,000 Dwt Vessel Values

# Chinese Dry Bulk Trade

**Chinese Dry Bulk Trade Volume**

**China is a Net Importer of Coal**

**China net imports increased dramatically since 2008**

**East-West trade imbalance has widened causing increasingly inefficient deployment of the global dry bulk fleet**

**China coal imports continue to pick up in fourth quarter**

# Chinese Iron Ore Demand

## China Iron Ore Sourcing for Steel Production

## Chinese Steel & Iron Ore Prices

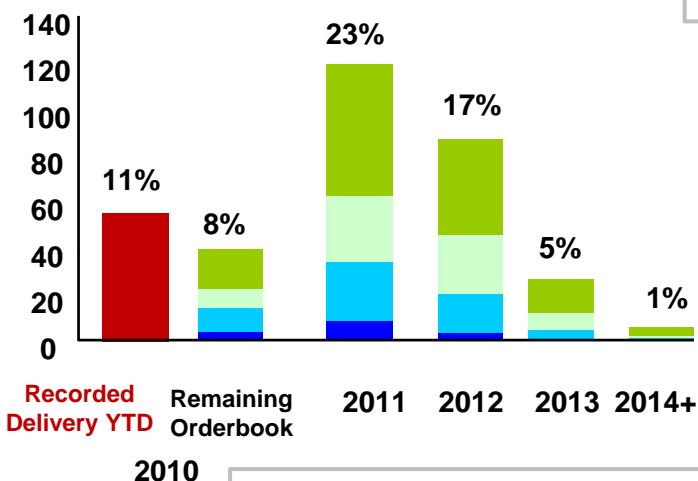

**Growth in Chinese import of raw materials, though not at same unprecedented pace as 2009**

**Expected revival in Chinese commodity imports**

**Restocking combined with increased foreign versus domestic iron ore arbitrage, driven by a drop in Q4 quarterly price**

# Dry Bulk Orderbook

Mil Dwt Scheduled Orderbook by Year

**Total Dry Bulk >10,000 Dwt**

- Capesize
- Panamax
- Handymax (35,000-59,999 Dwt)
- Handysize (25,000-34,999 Dwt)

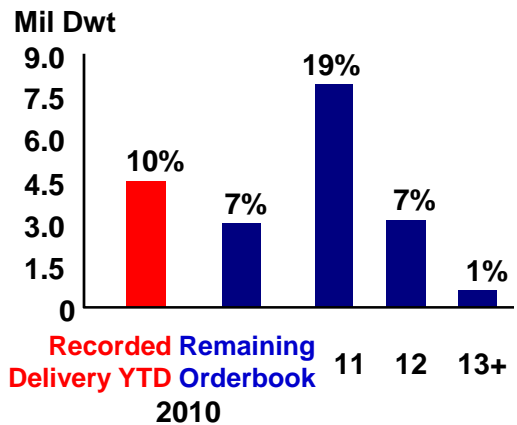

Orderbook as % of Existing Fleet      Average Age

<b>54%</b> (62%)	
<b>67%</b> (90%)	<b>10.1</b>
<b>54%</b> (49%)	<b>12.0</b>
<b>46%</b> (54%)	<b>15.4</b>
<b>34%</b> (44%)	<b>15.0</b>

Handysize Scheduled Orderbook

460 vessels (14.6 million dwt) - 34%

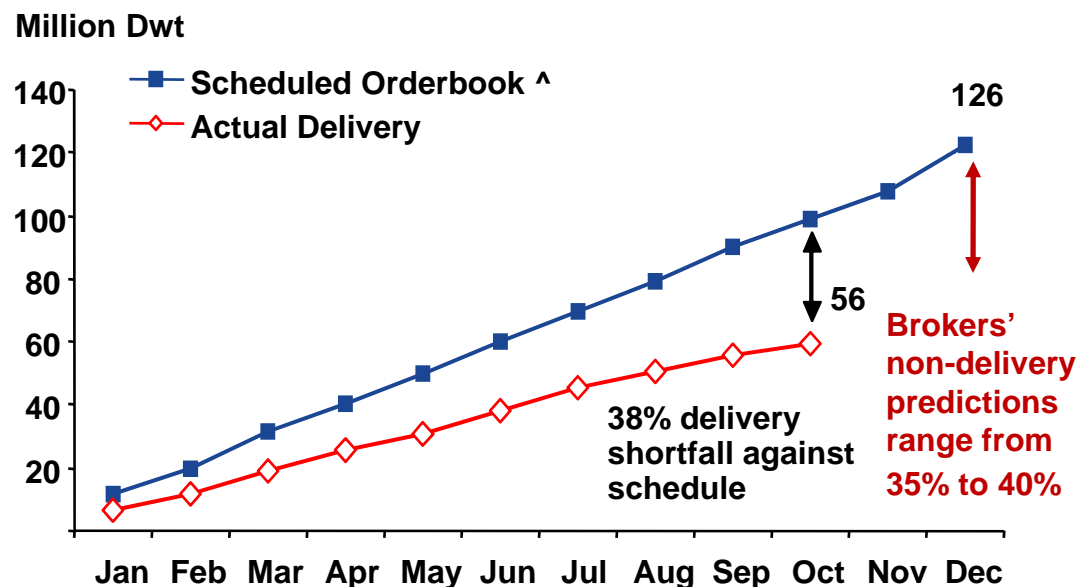

Handysize Age Profile  
1,442 vessels (42.7 million dwt)

- Estimated 7.5% of current dry bulk orderbook for the domestic Chinese fleet
- 27% of handysize fleet is over 25 years old

# Dry Bulk Fleet Delivery

Dry Bulk Fleet Delivery & Scheduled Orderbook 2010

**56 million tonnes (11%) delivered to dry bulk fleet in first nine months of the year**

**We estimate approximately 75 million tonnes of capacity will deliver in 2010**

**We expect handysize and handymax to outperform other dry bulk sectors mainly due to lower orderbook**

Source: Clarksons, Morgan Stanley

^Clarksons Jan 2010

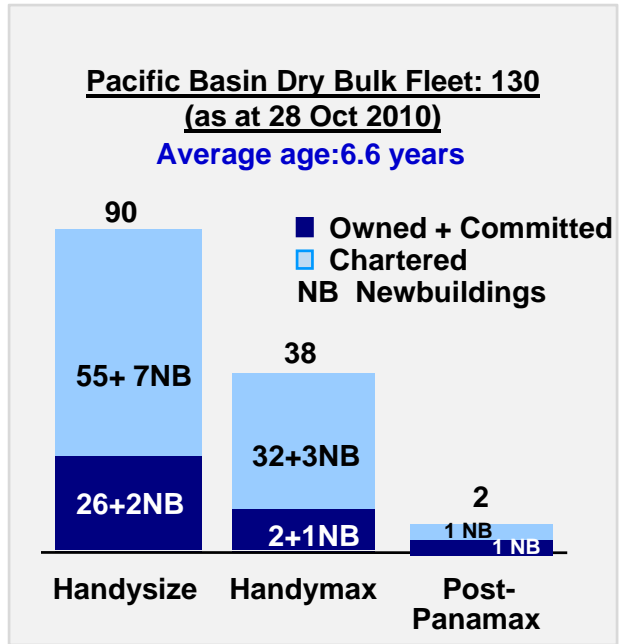

# Pacific Basin Dry Bulk

**Earnings Coverage (as at 27 Oct 2010)**

**2010 Total combined cover: 96%**  
**2011 Total combined cover: 46%**

- **Strategy:**
  - Secure forward cargo cover for 2011 and beyond
  - Maintain a cost-competitive fleet
  - Fleet expansion since Dec 2009:
    - Purchased 9 ships
    - Long-term chartered 8 ships

**B** ^ Excludes 2 handymax vessels on long term charter out  
 \* The total combined cover, stated at handysize equivalent days, is calculated as percentage cover on total handysize and handymax revenue days

# Dry Bulk Outlook

- Healthy demand for minor bulk commodities boosted by weaker US Dollar
- Seasonally stronger demand, particularly in the grain, iron ore and coal trades
- Restocking of Chinese iron ore and coal combined with increasing ore imports due to a lower fourth quarter price
- East-west trade imbalances further increasing inefficiency in fleet utilisation

- Rapid expansion of dry bulk shipping capacity due to excessive newbuilding deliveries

## **PB conclusion:**

**We expect to see a seasonal upswing in the market for our smaller bulk carriers in November and into early 2011, albeit for the handysize segment to remain relatively range-bound.**

# PB Energy & Infrastructure Services

Towage Fleet: 40 vessels  
(as at 31 July 2010)

## PB Energy & Infrastructure Services

	US\$m
Offshore/project supply & harbour towage services ("Towage")	(1.2)
Fujairah Bulk Shipping ("FBSL")	4.5
PacMarine Services	0.7

**Segment net profit in 1H10:**

**4.0**

- Q310 Performance:
  - Some revival in offshore towage and infrastructure support activity
  - Utilisation improved in our harbour towage business
  - Expansion of PB Towing Australia's customer base
  - Stronger than expected results from our new service in the Port of Townsville
  - FBSL's reclamation project is drawing to a close with 50mil tonnes of landfill delivered

# Energy & Infrastructure – Outlook

- Global economic recovery, albeit slow
- Increase in oil and energy prices
- Resumption of infrastructure and offshore projects
- Preseverance leading to better brand recognition and service quality

- Rationalisation of containership towage leading to less port calls
- US moratorium on deep-water drilling exerting downward pressure on rates
- Newbuilding deliveries
- Reduced demand for construction materials in the Middle East

## PB Conclusion

- Improvement in Australian harbour towage demand to continue
- Uncertain pace of recovery in Middle East infrastructure market
- Limited scope for improvement in remains 2010 but better outlook

# PB RoRo

**Net profit in 1H10: US\$0.5 m (1H09: -US\$0.4m)**  
**Annualised return on net assets: 1%**

- “Humber Viking” completed satisfactory 1st year on charter to Norfolk Line for 3 years in North Sea
- Took the delivery of 2nd vessel in early Oct 2010
- Committed an initial vessel to new RoRo service (Nafta Gulf Bridge project) between Mobile (US Gulf) and Veracruz (Gulf coast of Mexico), commencing by end 2010
- 4 newbuildings for delivery in 2010 & 2011
- Strategy
  - Become a tonnage supplier to major European freight service operators
  - Expand our marketing reach and actively continue to explore employment opportunities within and outside Europe

## RoRo Orderbook: 15%

41 Vessels  
(129,995 Lane Metres)

## World RoRo Fleet

460 Vessels  
(895,769 Lane Metres)

## Long-term fundamentals attractive:

- Ageing fleet (average age: 20 years)
- Weak market leading to significant scrapping: ~10% in Q1-Q310
- Negligible newbuilding orders since the start of 2009

# RoRo – Outlook

- European economic recovery to support combined modest growth in trailer volumes and short-sea RoRo trades
- Some trades making significant recovery towards pre-recession levels
- Scrapping limits overcapacity

- Significant RoRo newbuilding deliveries expected in 2010 and 2011
- European austerity measures
- Flatter recovery in US and slow, hesitant growth in developed countries

- PB Conclusion**
- Euro-centric RoRo market is improving with monthly European trailer volumes increasing year on year
  - Scrapping of RoRo tonnage in 2010 together with negligible newbuilding orders improve the supply picture from next year
  - We expect challenging trading environment for RoRos to continue despite some further recovery in 2011
  - Remain positive about the sector in the more distant future

# Outlook

- **Focus on three core businesses:**

Pacific Basin Dry Bulk

PB Energy &  
Infrastructure Services

PB RoRo

- **Overall dry bulk market recovered sooner than expected from a mid-year slow-down; we expect to see a seasonal upswing in the market for handysize bulk carriers from November and into early 2011**
- **Continued demand growth in China / Asia**
- **Market conditions improved for our other business divisions**
- **Business model and balance sheet position us well for further expansion of our dry bulk business as appropriate opportunities arise**
- **Our strategic goals remain unchanged:**
  - **To expand further our dry bulk fleet & business**
  - **To grow our energy and infrastructure services operations**
  - **To secure profitable employment for remaining RoRo newbuildings**

# 2010 Interim Financial Highlights

# Borrowings and Capex

As at 3 Aug 2010

Funded from US\$970m cash,  
new borrowings, and  
future operating cashflows

- Vessel capex (including purchase options) (US\$354m)
- Bank borrowings (gross of loan arrangement fee) (US\$375m): 2012-2021
- Finance lease liabilities (US\$192m): 2015-2017
- Convertible Bonds (Face value US\$120/230m): 2013/2016, redeemable in Feb2011/Apr2014

# Cashflow

Period ended 31 June 2010

US\$m

## Operating cash inflows

## Investing cash out / inflows

- Vessels & other fixed assets related payments
- Sales of vessels
- Jointly controlled entities related payments and receipts
- Net receipts from forward foreign exchange contracts
- Change in restricted cash & notes receivables
- Others

## Financing cash (out) / inflows

- Proceeds from issuance of convertible bonds
- Repurchase of convertible bonds
- Net repayment of borrowings and finance lease
- Proceeds from placement
- Dividends paid
- Others, mainly interest paid

# Appendix: China at late-Industrialisation Stage

## Steel Consumption Per Capita

Source: UBS, IISI, Pacific Basin

**China growth matches historical trend in Japan and Korea**

**Suggests strong growth in dry bulk segment to remain for medium term**

**Similar trend for electricity and cement**

# Appendix: Dry Bulk Demand

**Dry Bulk Fleet Demand and Supply**

- China Coastal Cargo Effect
- Congestion Effect
- Tonne-mile Effect
- International Cargo Volumes
- Net Demand Growth
- Supply Growth

- Growth in Chinese import of raw materials, including coal, iron ore and minor bulks such as logs
- Increased Chinese domestic coastal transportation in bulk carriers, especially iron ore and coal
- Widening East-West imbalance attracting more ballast vessels from Far East to distant load ports for return cargoes

# Appendix: Pacific Basin Dry Bulk - Diversified Cargo

**Pacific Basin Dry Bulk Cargo Volume Q1-Q3 10  
(Handysize and Handymax)**

**Diverse range of commodities reduces product risk**

**Australia, USWC and China were our largest loading & discharging zones respectively**

\*Other bulks: Gypsum and Sands  
( ) % changes against 2009
