Pacific Basin Overview

- One of the world’s leading dry bulk owner/operators of modern handysize and handymax vessels
- Pacific Basin Dry Bulk’s business model is highly flexible
  - Large fleet of uniform, interchangeable, modern vessels
  - Mix of owned, long-term and short-term chartered ships
  - Diversified customer base of mainly industrial end users
  - Providing variety of chartering options, mainly COAs & spot fixtures
- Growing presence in:
  - Energy & Infrastructure Services
  - RoRo Shipping
- 180+ vessels serving major industrial customers around the world
- Hong Kong headquarters, 20 offices worldwide, 360+ Group staff, 1,800+ seafarers *

* As at 1 Oct 2010
2010 Third Quarter Highlights

PB Dry Bulk

• Overall dry bulk market improved sooner than we expected following a mid-year slow-down, although rates for handysize and handymax segments have trended down since Sept.

• Baltic Dry Index has increased 60% since market upturn in July; Q3 average handysize spot rates increased 30% year on year despite slipping since September

• Market for smaller ships were influenced by:
  • Seasonal recovery followed by a subsequent decline in grain export & minor bulks shipments;
  • Rapid new ship deliveries

• Our core fleet has expanded with long term charters of 3 more ships (17 purchased and long term chartered since December 2009)

• We have secured forward cargo cover as follows:

<table>
<thead>
<tr>
<th></th>
<th>Year 2010</th>
<th>Year 2011</th>
</tr>
</thead>
<tbody>
<tr>
<td>Handysize</td>
<td>94% (US$16,670)</td>
<td>37% (US$14,230)</td>
</tr>
<tr>
<td>Handymax</td>
<td>99% (US$22,470)</td>
<td>109% (US$16,590)</td>
</tr>
</tbody>
</table>

We expect to see a seasonal upswing in the market for handysize and handymax bulk carriers in November and into early 2011
Dry Bulk Market Information

Sector Earnings Performance in 2010 versus Average 2009

During 2010, Handysize has been the best performer compared to last year.

Capesize has spent most of the year performing worse than in 2009.

Baltic Dry Index

5 Year Old 28,000 Dwt Vessel Values

Source: Clarksons (up to Oct 2008, since Jan 2010), Aggregate brokers estimates (from Oct 2008 to Dec 2009)

The Baltic Exchange
Chinese Dry Bulk Trade

China is a Net Importer of Coal

East-West trade imbalance has widened causing increasingly inefficient deployment of the global dry bulk fleet

China coal imports continue to pick up in fourth quarter

Source: Clarksons, Bloomberg LP
Chinese Iron Ore Demand

Growth in Chinese import of raw materials, though not at same unprecedented pace as 2009.

Expected revival in Chinese commodity imports.

Restocking combined with increased foreign versus domestic iron ore arbitrage, driven by a drop in Q4 quarterly price.

Source: Bloomberg LP, Steel Business Briefing, Pareto Securities, Deutsche Bank
Dry Bulk Orderbook

**Total Dry Bulk >10,000 Dwt**
- Capesize: 54% (62%)
- Panamax: 67% (90%) 10.1
- Handymax (35,000-59,999 Dwt): 54% (49%) 12.0
- Handysize (25,000-34,999 Dwt): 46% (54%) 15.4

**Handysize Scheduled Orderbook**
- 460 vessels (14.6 million dwt) - 34%

**Handysize Age Profile**
- 1,442 vessels (42.7 million dwt)
  - 0-15 years: 59%
  - 16-24 years: 14%
  - 25-29 years: 16%
  - 30+ years: 11%

**Estimated 7.5% of current dry bulk orderbook for the domestic Chinese fleet**
**27% of handysize fleet is over 25 years old**

Source: Clarksons 1 Oct 10 / Fairplay, Handysize is defined as 25,000-34,999 Dwt, (%) % as at 1 Oct 2009
56 million tonnes (11%) delivered to dry bulk fleet in first nine months of the year

We estimate approximately 75 million tonnes of capacity will deliver in 2010

We expect handysize and handymax to outperform other dry bulk sectors mainly due to lower orderbook

Source: Clarksons, Morgan Stanley

* Excludes 2 handymax vessels on long term charter out

* The total combined cover, stated at handysize equivalent days, is calculated as percentage cover on total handysize and handymax revenue days
Dry Bulk Outlook

• Healthy demand for minor bulk commodities boosted by weaker US Dollar
• Seasonally stronger demand, particularly in the grain, iron ore and coal trades
• Restocking of Chinese iron ore and coal combined with increasing ore imports due to a lower fourth quarter price
• East-west trade imbalances further increasing inefficiency in fleet utilisation

PB conclusion:
We expect to see a seasonal upswing in the market for our smaller bulk carriers in November and into early 2011, albeit for the handysize segment to remain relatively range-bound.

• Rapid expansion of dry bulk shipping capacity due to excessive newbuilding deliveres
PB Energy & Infrastructure Services

- **Q310 Performance:**
  - Some revival in offshore towage and infrastructure support activity
  - Utilisation improved in our harbour towage business
  - Expansion of PB Towage Australia’s customer base
  - Stronger than expected results from our new service in the Port of Townsville
  - FBSL’s reclamation project is drawing to a close with 50mil tonnes of landfill delivered
Energy & Infrastructure – Outlook

+ • Global economic recovery, albeit slow
  • Increase in oil and energy prices
  • Resumption of infrastructure and offshore projects
  • Preseverance leading to better brand recognition and service quality
  • Rationalisation of containership towage leading to less port calls
  • US moratorium on deep-water drilling exerting downward pressure on rates
  • Newbuilding deliveries
  • Reduced demand for construction materials in the Middle East

- • US moratorium on deep-water drilling exerting downward pressure on rates

PB Conclusion
• Improvement in Australian harbour towage demand to continue
• Uncertain pace of recovery in Middle East infrastructure market
• Limited scope for improvement in remains 2010 but better outlook
PB RoRo

Net profit in 1H10: US$0.5 m (1H09: -US$0.4m)
Annualised return on net assets: 1%

• “Humber Viking” completed satisfactory 1st year on charter to Norfolk Line for 3 years in North Sea
• Took the delivery of 2nd vessel in early Oct 2010
• Committed an initial vessel to new RoRo service (Nafta Gulf Bridge project) between Mobile (US Gulf) and Veracruz (Gulf coast of Mexico), commencing by end 2010
• 4 newbuildings for delivery in 2010 & 2011
• Strategy
  • Become a tonnage supplier to major European freight service operators
  • Expand our marketing reach and actively continue to explore employment opportunities within and outside Europe

Long-term fundamentals attractive:
• Ageing fleet (average age: 20 years)
• Weak market leading to significant scrapping: ~10% in Q1-Q310
• Negligible newbuilding orders since the start of 2009

Source: Maersk Broker, data as at June 2010
RoRo – Outlook

- European economic recovery to support combined modest growth in trailer volumes and short-sea RoRo trades
- Some trades making significant recovery towards pre-recession levels
- Scrapping limits overcapacity

- Significant RoRo newbuilding deliveries expected in 2010 and 2011
- European austerity measures
- Flatter recovery in US and slow, hesitant growth in developed countries

PB Conclusion
- Euro-centric RoRo market is improving with monthly European trailer volumes increasing year on year
- Scrapping of RoRo tonnage in 2010 together with negligible newbuilding orders improve the supply picture from next year
- We expect challenging trading environment for RoRos to continue despite some further recovery in 2011
- Remain positive about the sector in the more distant future
Outlook

• Focus on three core businesses:
  - Pacific Basin Dry Bulk
  - PB Energy & Infrastructure Services
  - PB RoRo

• Overall dry bulk market recovered sooner than expected from a mid-year slow-down; we expect to see a seasonal upswing in the market for handysize bulk carriers from November and into early 2011

• Continued demand growth in China / Asia

• Market conditions improved for our other business divisions

• Business model and balance sheet position us well for further expansion of our dry bulk business as appropriate opportunities arise

• Our strategic goals remain unchanged:
  • To expand further our dry bulk fleet & business
  • To grow our energy and infrastructure services operations
  • To secure profitable employment for remaining RoRo newbuildings
## 2010 Interim Financial Highlights
