2010 Group Highlights

- Net Profit: US$104m (2009: US$110m)
- Underlying Profit: US$120m (2009: US$116m)
- Basic EPS: HK$0.42 (2009: HK$0.46)
- ROE: 7% (2009: 9%)
- Cash and deposits on the balance sheet: US$703m

Results incorporate:
- US$19m impairment of Fujairah Bulk Shipping
- US$12m unrealised derivative expenses
- US$16m gain from sale of part of holdings in Green Dragon Gas

- 2010 Dividend per share: HK$0.215 (2009: HK$0.23)
  - Including proposed final dividend of HK$0.165
Pacific Basin-Dry Bulk Performance

- **Dry bulk net profit:** US$145m (↑17% vs 2009)
- **Handysize:** US$136m (↑10%)
- **Handymax:** US$9m (↓35%)
- **31.7m tonnes of cargoes were carried in 2010 (↑9.4%)**
- **Strategy:**
  - Maintain a cost-competitive fleet. From end 2012 onwards, will benefit from 10 newbuildings we contracted in 4Q 2010
  - Fleet expansion of our handysize and handymax fleet at a reasonable cost
    - Since Dec 2009, purchased 22 ships
    - Long-term chartered 10 ships
Differentiated from BDI & Traditional Ship Owning

Smaller bulk carrier segment benefits from:

- Handysize orderbook smaller than ship capacity over 25 years old
- Diverse range of commodities carried and trade patterns
- Greater access to ports
- Growing minor bulk trade imbalances

Fleet
- Modern, large scale & interchangeable ships
- Ability to change market exposure through charter activity
- Higher utilisation and earnings ability through optimum scheduling
- Low breakeven cost and fuel efficient

Unique network of offices
- Close to our customers and understand their needs
- Local chartering and operations staff support
- Broad access to cargo and contract opportunities
- New office in New York

Customer focus
- Strong relationship with over 200 customers
- Mainly industrial commodity producers and end-user
- Mixed with spot & long term contracts of affreightment

Corporate profile
- Trusted & transparent counterparty
- Strong public balance sheet and track record
Dry Bulk Market Information

Sector Earnings Performance in 2010 versus Average 2009

Handysize has been the best performer in 2010

- Handysize (BHSI)
- Handymax (BSI)
- Panamax (BPI)
- Capesize (BCI)

Source: The Baltic Exchange, Clarksons
2010 Dry Bulk Market

1H 2010
- Buoyancy early in the year:
  - Strong growth in minor bulk commodity demand from China and other emerging economies
  - Restocking
  - Reduced foreign raw material supply led to higher domestic sourcing demand, hence increased Chinese coastal trade

2H 2010
- Weakness in the second half 2010:
  - Seasonally reduced activity mid year
  - Chinese government policy on energy consumption reduced commodity imports
  - Dry Bulk fleet expansion
  - Severe flooding in major raw materials export areas

- Handysize & handymax again fared better than other dry bulk segments in 2010
- Decreasing correlation between handysize market and the bigger sectors

Source: The Baltic Exchange
Chinese Dry Bulk Trade

- China dependency increased dramatically since 2008
- East-West trade imbalance has widened causing increasingly inefficient deployment of the global dry bulk fleet
- Variable earnings premium of Atlantic and Pacific compounded by higher fuel costs make repositioning of ships more prohibitive thus leading to market inefficiency

Source: Clarksons
Strong Minor Bulk & Coal Demand from China

- Soya bean comprised 2% of PB volumes in 2010 (+46% YOY)
- Logs & forest products comprised 12% of PB volumes in 2010 (+42% YOY)
- Copper Concentrates comprised 7% of PB volumes in 2010 (+80% YOY)

- Significant growth and restocking in minor bulk commodity demand from China and other emerging economies
- 31% growth in coal YOY

Source: Bloomberg, Clarksons
Note: Copper Concentrates data available since 2008
Dry Bulk Demand

Dry Bulk Fleet Effective Demand

- **Growth in Chinese import of raw materials, including coal and minor bulks such as logs & grains**
- **Increased Chinese domestic coastal transportation in bulk carriers, especially coal**
- **Widening East-West imbalance attracting more ballast vessels from Asia to distant load ports for return cargoes**

Source: R.S. Platou
Dry Bulk Fleet Changes

- 79m tonnes of new dry bulk capacity delivered in 2010, growth 16.7% net YOY
- Handysize fleet 2010 growth 11% net YOY
- 38% delivery shortfall in 2010 against scheduled orderbook
- 41% of handysize fleet is over 25 years old
- High scrapping price supports scrapping activities

Source: Clarksons, as at 1 Feb 2011
### Dry Bulk Orderbook

- **137 m dwt** of new dry bulk capacity scheduled to deliver this year (2010: 126m)
- We expect 30-40% of slippage in 2011, net deliveries before scrapping in 2011 will be 15-18%
- Minor bulk orderbook, handysize in particular, is less onerous (15m dwt)
- Bleak outlook for the major bulk vessels with heavy orderbook (54m dwt)

**Handysize Scheduled Orderbook**

- 738 vessels (24.8m dwt) - 39%

**Total Dry Bulk Orderbook**

- 3,387 vessels (298m dwt)

**Orderbook as % of Existing Fleet**

Dry Bulk Outlook

<table>
<thead>
<tr>
<th>Positive Factors</th>
<th>Negative Factors</th>
</tr>
</thead>
<tbody>
<tr>
<td>- China’s continued dependence on imported minor bulks from further afield</td>
<td>- Continued excessive newbuilding deliveries</td>
</tr>
<tr>
<td>- Strong growth in developing countries increased steel &amp; raw materials demand</td>
<td>- Dry bulk demand stifled by shortfall in mining capacity and other supply bottlenecks</td>
</tr>
<tr>
<td>- Restocking after Brazil &amp; Queensland floods, and harsh northern hemisphere winter</td>
<td>- High commodity price favours Chinese switch to domestic iron ore</td>
</tr>
<tr>
<td>- Slippage continue in 2011 deliveries as yards decelerate production</td>
<td>- Weather problems</td>
</tr>
<tr>
<td>- Increased scrapping due to high fleet age</td>
<td></td>
</tr>
</tbody>
</table>

**Pacific Basin Conclusion**
Handysize dry bulk market in 2011 is expected to be weaker than 2010
Near term demand recovery eclipsed by continued newbuilding deliveries
However, we remain encouraged by prospects for the longer term
PB Energy & Infrastructure Services

<table>
<thead>
<tr>
<th>Service Description</th>
<th>US$m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Offshore/project supply &amp; harbour towage services (“Towage”)</td>
<td>1.0</td>
</tr>
<tr>
<td>PacMarine Services</td>
<td>1.0</td>
</tr>
<tr>
<td>Fujairah Bulk Shipping (“FBSL”)</td>
<td>2.9</td>
</tr>
<tr>
<td><strong>Segment net profit in 2010 (2009: US$8.2m)</strong></td>
<td><strong>4.9</strong></td>
</tr>
</tbody>
</table>

Towage Fleet: 42 vessels (as at 25 Feb 2011)
- 32 Owned Tugs
- 7 Barges
- 2 Chartered Tugs
- 1 Bunker Tanker

Offshore Towage and Infrastructure Support Services
- Continued to perform well despite deferral of Australian projects negatively impacting fleet utilisation
- Secured a contract to transport aggregates for the Queensland Curtis LNG project at Gladstone and other further projects, expected to start in 2011

Harbour Towage
- Successfully commenced operation in the Port of Townsville
- Our exclusive towage licenses in 2 bulk ports benefitted from strong commodity exports

FBSL
- FBSL did well with Northern Project drawing to a close
- Protracted difficult economic conditions resulted in the decision to scale down the business and make a US$19 million impairment against our investment
## Energy & Infrastructure – Outlook

### Positive Factors

- Increasing oil and energy prices are leading to more offshore projects and related infrastructure development activities
- Further economic recovery, thus increasing number of tug jobs

### Negative Factors

- Slow resumption of infrastructure and offshore projects in the Middle East
- Some further delays to new project timelines
- New competition from Southeast Asian operators targeting the Australian sector

### Pacific Basin Conclusion

Encouraging signs of improvement in the Australian offshore towage market offset by expected negative contribution from the Middle East giving mixed outlook
PB RoRo

- Slow export-led recovery in European economy remains fragile
- Charter demand for RoRo vessels is still very weak and well below what we had expected a year ago
- Four of our six investments now have employment
- Invested in NGB Express Lines in December 2010 to operate the new Nafta Gulf Bridge RoRo service between Veracruz (Mexico) and Mobile (USA)
- Last three newbuildings deliver in 2011

Net loss in 2010: -US$1.1m (2009: Profit US$0.1m)

World RoRo Fleet
438 Vessels
(862,453 Lane Metres)

- 0-14 Year: 44%
- 15-24 Year: 13%
- 25-29 Year: 14%
- 30+ Year: 29%

Long-term fundamentals attractive:
- Aging fleet (average age: 25 years)
- Weak market leading to significant scrapping: ~12% in 2010

Source: Navitaship, Feb 2011
RoRo – Outlook

**Positive Factors**
- Global and especially European economic recovery expected to support modest growth in trailer volumes and short-sea RoRo trades
- Scrapping will continue to erode overcapacity
- New RoRo routes emerging

**Negative Factors**
- Significant number of large RoRo newbuilding scheduled to deliver in 2011
- Excess capacity and reluctant to charter new vessels in core European market
- Medium term prospects of some European economies remains uncertain

**Pacific Basin Conclusion**
- Timing of a sustainable improvement in the RoRo market predicted too early
- Despite ongoing marginal improvement in freight volumes for the sector, RoRo market expected to remain depressed resulting in a loss-making year for PB
- Positive on the longer term prospects

Outlook

- We anticipate the dry bulk market will be weaker than 2010
- Recovery from regional export disruptions and increased scrapping will be ultimately eclipsed by continued excessive newbuilding deliveries during the year
- Prospects for minor bulk segments in long term remain positive
- Business model and strong balance sheet position us well for further expansion of our dry bulk business as opportunities arise
- Improved outlook for PB Towage but expected negative contributions from Middle East.
- Charter market for RoRo vessel to remain depressed despite better freight volumes
- Our strategic goals remain unchanged:
  - To expand further our core dry bulk fleet at reasonable cost
  - To consider further divestment of certain non-core assets in 2011
Disclaimer

This presentation contains certain forward looking statements with respect to the financial condition, results of operations and business of Pacific Basin and certain plans and objectives of the management of Pacific Basin.

Such forward looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results or performance of Pacific Basin to be materially different from any future results or performance expressed or implied by such forward looking statements. Such forward looking statements are based on numerous assumptions regarding Pacific Basin's present and future business strategies and the political and economic environment in which Pacific Basin will operate in the future.
Appendix: Pacific Basin Overview

- One of the world’s leading dry bulk owners & operators of modern handysize and handymax vessels
- Flexible Pacific Basin dry bulk business model
  - Large scale fleet of uniform, interchangeable modern vessels
  - Mix of owned, long-term and short-term chartered ships
  - Diversified customer base of mainly industrial end users
- Presence in
  - Energy & Infrastructure Services
  - RoRo sector
- Over 180 vessels serving major industrial customers
- Hong Kong headquarters, 21 offices worldwide, 375 Group staff, 2,100+ seafarers *

* As at Jan 2011
Appendix:
Pacific Basin Dry Bulk - Diversified Cargo

Pacific Basin Dry Bulk Cargo Volume 2010

- Alumina: 6% (0%)
- Coal / Coke: 7% (-2%)
- Concentrates: 10% (+2%)
- Fertilisers: 8% (+1%)
- Logs & Forest Products: 12% (+3%)
- Ore: 6% (-4%)
- Grains & Agriculture Products: 17% (+4%)
- Sugar: 6% (-2%)

Conversion Condition
- Before 11 Jan 2011: No Conversion is allowed
- 12 Jan 2011 – 11 Jan 2014: Share price for 5 consecutive days > 120% conversion price
- 12 Jan 2014 – 5 Apr 2016: Share price > conversion price

Intended Use of Proceeds
To purchase the 3.3% Existing Convertible Bonds due 2013 then redeem the remaining part of the Existing Convertible Bonds should bondholders’ request on 1 Feb 2011 or maturity in 2013

Conditions
- Shareholders approval at SGM to approve the issue of the New Convertible Bonds and the specific mandate to issue associated shares.
- If the specific mandate is approved by the shareholders at the SGM, the company would not pursue a new general share issue mandate at the forthcoming AGM on 22 April 2010

Conversion/redemption Timeline

- **PB’s call option to redeem all bonds**
  1) Trading price for 30 consecutive days > 130% conversion price in effect
  2) >90% of Bond converted / redeemed / purchased / cancelled

- Bondholders can convert to PB shares after trading price for 5 consecutive days > 120% conversion price in effect
- Bondholders can convert to PB shares when trading price > conversion price
- Bondholder’s put option to redeem bonds
