Pacific Basin

3Q17 Trading Update

12 Oct 2017
Similar freight market pattern YTD as last year, but at higher level
- Seasonal mid-year decline affected 3Q rates
- Recent increase in rates is positive, but benefit is limited in 2017 due to lag between fixing and earning and because much of 4Q is already covered

* excludes 5% commission

Key Demand Drivers for 2017

- 1H17 actual dry bulk effective demand growth about 4.5%
- Clarksons estimate full year 2017 dry bulk effective demand growth will exceed 5% (compared to +1.9% in 2016 and -0.9% in 2015)
- Strong American grain exports, including record high 3Q volumes from Brazil
- SE Asia coal imports increased
- Strong imports of minor bulks into China +18% YOY to highest level since 2013
- Soybean, bauxite and logs growing at healthy levels

2017 Third Quarter Trading Update

- Market improvement since last year benefits our owned and long term chartered ships which have mainly fixed costs
- Market rates increased at end of 3Q but, due to lag between fixing and earning and 4Q is already mostly covered, these stronger rates will have marginal effect on our 2017 results
- Our capacity has increased YOY due to larger owned fleet (soon 106 ships), complemented by ships on shorter-term charters
  - Acquired 5 modern dry bulk ships in Aug funded by:
    - New PB shares issued to the sellers
    - Cash raised through a share placement
    - Cash from our existing cash resources
- Continue to look at attractive secondhand ship acquisition opportunities if they can generate a reasonable payback at prevailing asset prices and freight earnings
- Our final tug sold in 3Q thus concluding our exit from non-core towage activity
Vessel Values Increased YOY

- Improved freight market conditions supported increased vessel values
- Newbuilding and secondhand prices have increased YOY, but secondhand values remain below the low of 2013
- Gap between newbuilding and secondhand prices continues to discourage new ship ordering

New Vessel Ordering is Down

- Historically low levels of ordering
  - Handymax: 0.8%
  - Handysize: 0.9%

- Combined Handysize and Supramax orderbook now at 5.4%, lowest since Oct 1999
- Net fleet growth estimated at about 3.5% in FY17
- Very low new vessel ordering in last 18 months influenced by:
  - Secondhand values still low
  - New low sulphur and Ballast Water Treatment System regulations create uncertainty of design
  - New accounting rules from 2019 discouraging new long-term time charters

*Source: Clarksons Platou, as at 1 Oct 2017*
Dry Bulk Supply & Demand

- Demand is recovering and outpacing supply so far in 2017
- For full year 2017:
  - Clarksons estimate effective demand growth to exceed 5%
  - PB estimate net supply growth around 3.5% (5.0% deliveries – about 1.5% scrapping)
- Progressively fewer new ships will deliver from shipyards in 2018 and 2019
- However, risk of new ordering and the potential for increased vessel speeds remain negative factors

Source: Clarksons Platou, Pacific Basin
As at 30 June 2017

1H17 Daily Vessel Costs – Handysize

- Daily cash cost before overhead: US$6,310 (1H16: US$6,010)
- Charter-hire costs increased due to new ST charters in stronger market
- Opex further reduced due to scale benefits
- **Overheads** reduced to US$590/day (1H16: US$680/day) - includes all direct & indirect costs

*Chartered rates are shown net of provision*
**1H17 Daily Vessel Costs – Supramax**

- **Owned**
  - **Blended US$8,360 (FY2016: US$6,830)**
  - FY2016: US$8,590, 6,060 days (20%)
  - 1H2017: US$8,220, 3,600 days (21%)
  - FY2016: US$6,380, 23,640 days (80%)
  - 1H2017: US$8,400, 13,800 days (79%)

- **Chartered**
  - FY2016: US$3,390, 6,060 days
  - 1H2017: US$3,270, 3,600 days

- **Inward Charter Commitments**
  - Days & Rates 2017-2018
  - 1H17: 13,800 days, 300 days at US$7,960
  - 2H17: 5,190 days, 300 days at US$7,960
  - 2018: 3,400 days, 300 days at US$7,960

- **Finance cost**
  - Daily cash cost before overhead: US$7,850 (1H16: US$5,940)

- **Charter-hire: Short-term (ST) / Long-term (LT)**
  - Charter-hire costs increased due to new ST charters in stronger market

- **Opex**
  - Further reduced due to scale benefits

- **Overheads**
  - Reduced to US$590/day (1H16: US$680/day) - includes all direct & indirect costs

---

*Chartered rates are shown net of provision*
Our Ability to Outperform

Our business model has been refined over many years. We are able to generate a TCE earnings premium over market rates because of our high laden percentage (minimum ballast legs), which is made possible by a combination of:

- Our fleet scale
- High-quality substitutable ships
- Experienced staff
- Global office network
- Our cargo contracts, relationships & direct interaction with end users
- Our fleet has a high proportion of owned vessels facilitating greater control and minimising trading constraints
- Our segment’s versatile ships and diverse trades

Average PB premium over market indices in last 5 years:

- Handysize TCE: **US$1,940/day**
- Supramax TCE: **US$1,290/day**
Our Outlook and Strategy

Dry Bulk Outlook

- Market conditions have improved since last year and we believe the worst of the current Dry Bulk market cycle is behind us.
- Demand has recovered and benefit from growing grain consumption for animal feed and increased government stimulus in China.
- The shrinking orderbook bodes well for long-term but more time, scrapping and limited ordering are required for a more normal market balance to be sustained.

Strategy

- Continue to focus on our world-leading Handysize & Supramax business.
- Maximise our fleet utilisation and TCE earnings by combining minor bulk characteristics with our large fleet of substitutable ships & global office network.
- Continue to assess attractive secondhand vessel acquisition opportunities if they can generate reasonable return & payback.
- Healthy cash and net gearing positions enhance our strong corporate profile: preferred, strong, reliable, safe partner for customers and other stakeholders.
- We are well positioned for a recovering market.
